

RECENT BUCKS

Rev: 07/12/2022

CF/Sales2thru10: RECENT BUCKS Rev

Foundation Bucks are in a different list

ALL OUR BUCKS TEST CAE NEGATIVE

There are many award programs, but the only one that actually measures the true genetic value of the animal is the USDA Top Buck List, commonly called the Sire Summary, and called by ADGA "Elite Buck List". (And it's counterpart, the Elite Doe List). You can find it and more at cdcb.us/eval.htm? Go to cdcb.us, click on genetic evaluations, and scroll all the way down. There you will see "Top Buck". It's that easy to be a great breeder.

The Sire Summary (called by ADGA the "Elite Buck List") is a very complex USDA computer program which gives every animal a "percentile." Also called "Rank", "Percentiles" take into account fat and protein as well as milk. And even more exciting, the lactations of every relative. All the Saanens in the country which have EVER been on test are hooked up by the USDA computer. Every relative - no matter how distant! WOW!

SGCH WILLOW RUN BRAVEHEART KAHUNA AS1230247 Born April 4, 2002
American Saanen **LA-90** Henning
PTAM +132 %ile 58 PTAFS +0.9

DIED 2008

SS: WSU/VMP MCBAIN *B AS0964478
S: WILLOW RUN MCBAIN BRAVEHEART *B AS1177689
SD: SGCH WILLOW RUN DREAM BIANCA 5*M **NAT'L CHAMPION**

DS: FULL-CIRCLE BAILEY'S LEGACY +*B AS1019423
D: SGCH MCQUITTY-FARM ALOHA AS1077866 **NAT'L CHAMPION 2x**
DD: MCQUITTY-FARM ALYSIA AS1034076

He looked awesome. We liked his rump angle, length ,overall size, and rear leg angulation. We didn't like the way he sometimes planted his front feet together and toed out. Hoof trimming cured that. Helen Snyder said his daughters don't toe out in the front. Ours didn't either.

Incredibly ALOHA was 1st place in her class at the Nationals **FOUR** years in a row!

ALOHA once had a 19.9 lb test, but she is a "summer spurter."

His butterfat % is poor, just like his dam. Also, his daughters are "Summer Spurters." Our herd is known for being "Through Milkers."

On March 17, 2005 Jennifer Frutos wrote "KAHUNA's kids are GORGEOUS! I can tell you that. You can tell all of them are related. He definitely puts a stamp of consistency in his kids: I only had 6 of them, but it is enough to be able to tell."

KAHUNA had 68 registered dau's as of October 2013.
If we were any good at A/I we would use him on the show string.

The Appraisers waved YELSON off. They have to do ALL the does but they try to save us the embarrassment of a low score on bucks. So they say "You don't want to do him" when he starts coming out of the pen.

But we loved his Rear End Assembly. **The Big Arc.**

CAPRIKORN YELSON STARBY *B #1149 AS1614094

Beat the whole herd as a yearling AND as a two-year-old

DDS: +*B CAPRIKORN MAJESTIC PRINCE Former Elite Buck
DD: CAPRIKORN MP YIARA LA-88 VEVV
YIARA was #1 in the whole herd our May DHI test. Possible
Top Ten when she was bought mid location - for \$2,250
01-10 305 2908 95 3.3% 84 2.9% -
DDD: WIARA- **Top Ten**
02-10 272 3411 81 2.4% 81 2.9%
03-11 305 4181 108 2.6% 113 2.7% Top Ten
04-11 72 1183 28 2.4% 30 2.5% IN PROGRESS

BLUE STAR is still not yet proven even though he has A LOT of daughters. AQUAGIRL WAS BOUGHT FOR OVER \$2,000. She had an awesome body but Scott pointed out that the teats rub the inside of the leg, making her a mastitis candidate.

He is "Dairy Farmers Only" because his dam was not a GCH and did not have an E mammary. These two criteria are what the NSBA'er hobbyists start with. The frequency of E mammaries in his daughters is lower.

We took BLUE to his first show on June 8 of 2014. He was 2nd of 3 in the first ring, first of three in the second ring, third of three in the third ring & 1st of three in the 4th ring. He was Grand in the 4th Ring and Reserve in the 2nd Ring.

His numbers on the July 2015 Elite Buck List are **equivalent to the Number One Buck** on the Sire Summary AKA Top Buck AKA Elite Buck List.

But he does not qualify because all his dau's on test are in our herd.

(Need two different herds.)

GCH +*B ALDER RIDGE CHINOOK HES 88.35 CHINOOK LA-90

REBEL VALLEY'S SOUTHERN BONUS 305 6850 EXPUNGED.

DS: +*B ROCKY RUN E.T. PIONEER - TOP 15%

USDA JULY '89 SIRE SUMMARY

D: CAPRIC PIONEER'S JANELLE 5*M S678898 HES FS-88.5

GA87 DC90 BC96 MA87

DD: Greco's Piney Hill Stephanie 4*m top ten

PTA 275

1-01 297 2867 116 4.0%

2-00 305 3811 149 3.9% - 323 3943 153 EXTENDED

3-00 168 1715 68 3.9%

JANELLE was a very tall, long bodied and dairy doe. She had an excellent rear udder, good side attachment and teats, but a pocket in her fore.

JANELLE missed Top Ten with the 149 although most years that's plenty. Her dam, Greco's Piney Hill STEPHANIE, her granddam Mariwillo Joy's LONI, and her great granddam Mariwillo HI JOY were all three Top Ten does. This is the great MARIWILLO doe line that resulted in the dam of ATLAS (p.15) and several other Top Ten does. JANELLE changed herds during the 3811 149 lactation.

CHINOOK'S secondary job was to integrate the bloodlines. He could do this in one breeding because he descended from:

1. VOICE OF REASON
2. REBEL VALLEY'S SOUTHERN BONUS 305 6850
3. The MARIWILLO DOE LINE

A great additional blessing we never hoped for was that CHINOOK had **bone**. Generally the top milk bucks are too dairy, limiting their usefulness. We didn't like his feet, pointing out, but we liked his daughter's feet. They all have nice arches, too.

We must tell you that in spite of his 90 and GCH Scott thought of Chinook as an ugly buck. His daughters did very well in the show ring, though.

CHINOOK has 72 registered daughters as of October 2013.

SMHcodeW90

SGCH *B INOV RENOVATOR "240" AS181247924 Born April 9, 2002
American Saanen **NOT RECENT**
Died Jan 2010 LA-92 (at 4 yrs old)
WAS #1 on Elite Buck list until July 2011! Now "inactive".

SS: ++*B SARTYR CASCADE PHAROH AS1050126
S: +*B PHAROH INNOVATOR AS1101354 PTAM +358 FAT% -0.16
SD: GCH IMAGE INDY AS1018537

D: MT BRENNIA AS1180328 PTAM +197 85th %ile
DD:IMAGE BUNNY AS1018550

The Sire, INNOVATOR was #1 on a previous USDA Sire Summary. He once was the only "active" buck rated at over 400 PTAM. He would still be on top but he is called "inactive". The dam's fat % is low (-0.19%). But he has strong bones. RENOVATOR started life ugly. Incredibly steep. The person who delivered him asked: "why would you want such a buck?"
AND NOW HE HAS OUR HIGHEST MALE LA EVER! So perhaps we should stop asking what your BABY buck looks like and START focusing on what his ancestors looked like!

GCH @ 2007 District II Saanen Specialty.

His distinctive feature was his broad, powerful muzzle. He also had a huge spring of rib.

RENOVATOR has 19 registered dau's as of October 2013.

STARGATE - Laid back, unassuming, matter of fact, and
just kept eating.

And a smashing first lactation from a doe that kidded at 1yr 8
months of age! Shown once, 3rd of 5. Shown 2nd time, RGCH to
ROMANCE p.30. Shown 9/17/05, 3rd of 4. 4th time out GCH vs 14
over Diana Patton's entries and also DREAMCATCHER, the 2nd place
National Show doe, on 5/27/06. 5th show 3rd of 7 same day. 6th
show 2nd over Nelson Broadbus. Full sister to ROAD SHOW, p.19,

who is also a 90! Can never be a National Champion because shoulders are too loose. We didn't believe the Official Testers 21.0 so we weighed her exactly 6 hours after milking and got 5 lbs 7.5 oz.

STARGATE **BEST UDDER** at 2006 District III Saanen Specialty over 24 Milking Does!

In 1982 and '83, GCH HARTSELL'S HERD BB'S DOUG FRAN turned in lactations of 5110 and 5930, respectively. No other Saanen dairy goat had two 5,000 lb. 305's in the United States until STARGATE came along.

CAPRIKORN ZEPP0 CZARGATE #2129 is the full brother of CZARBUCK above. At least three of his kids have folded ears. On the plus side his PTAM IS MORE THAN GOOD ENOUGH TO BE IN THE ELITE BUCK LIST **AND UNLIKE MOST OF THEM HE IS POSITIVE FOR BOTH FAT% AND PROTEIN PERCENT**. On the minus side CZARGATE had two sons from the great SGCH MEADOW ZEPHYR LA-92 Top Ten twice that were overly narrow in front. Weird.

CZARGATE - full brother same get as CZARBUCK above, injured himself. Permanently. So we used him here, because we don't sell defective Saanens. And hope someone bought his brother CZARBUCK #2130, above, who is much better looking.

As the years went by we realized he was the reason we were getting crimped ears. So we switched to his brother CZARBUCK. CZARBUCK is not proven yet.

GCH ++*B CAPRIKORN JUDGE'S KRUGERRAND AS1043068 #311 Born May 1997

*B CAPRIKORN RENOV VANDERBILT "MOOSE" #514 Born Feb. 14, 2005
Dairymen Only Former Sire Summary Buck LA-87 RICHTER
Died 2010 LA-84 White

S: SGCH RENOVATOR LA-92 page 18

DS: ++*B GCH ALDER RIDGE CHINOOK LA-90 page 17

D: CAPRIKORN CHINOOK'S KENT STATE - Top Ten

KENT STATE went to the White House for Hillary Clinton's
50th Birthday Party in Oct. '97. She was really big like her mom
and dad.

17th Junior Kid at '97 Nationals

Grand Champion at '97 Frederick County Fair

3rd of 7 behind KWANZA and the GCH '99 Frederick Fair

DD: DASCAN PEPPERDINE AS0781021

Top Ten - LA-87 HES - 88.75 LA-79 WHITE

3-10 332 4240 105 2.5%

2-08 305 4010 108 2.7% Top Ten

1-11 137 1570 43 2.7%

PEPPER's dam was 1st in her class at the CA State fair, which is
next best to 1st place at the Nationals. Better some years. Over
half the animals in PEPPIE's 3 generation pedigree are GCH's.
It's simple. We had been breeding for MILK, not show, for 17
years and PEPPER was the top milker in our herd in 1993. Her June
'93 test was 20.2 lbs.

PEPPER couldn't handle the heat at all. The 87 is too high if you
equate LA's to Show. LA's are for dairymen. Teats too big.

MOOSE WAS HUGE AND ALL HIS BABIES WERE TOO.

He made BIG ears and BIG milk. He can throw color.

A hyperactive giant, MOOSE had milk written all over him. At one year
and 2 months he was bigger than all the mature bucks here. In June OF
'07 the Appraiser got 40 7/8" at the withers.

His only clear flaw was a little narrowness in the chest like his
entire dam's family.

Has the numbers to be on Top Buck List, but no NEW dau's, so "INACTIVE"

MOOSE's dam was especially good for dairymen paid by components.
MOOSE has 22 registered dau's as of October 2013.

He deserves to be a Sire Summary Buck because his PTAM is +290. But the
computer considers his to be "inactive".

Lifetime 18,760 as of May 2016 and should break 20,000 in 2016
For some reason 3900 pound lactations don't sell. But it's a whole lot better for the milk check than one 4300 pound lactation (Top Ten!) and two 3400 pound lactations. So we guess her doe kids will stay here since no one wants to pay what they will make for us in cheese. Not to mention they can produce herdsires who will radically increase someone's milk check.

When ZINUSKA was born Scott was so excited about ZINUSKA's potential he kept her from being listed anywhere. Trying to keep her from being sold, he also made her miss her shots. Her Mar 26, 2011 test was 18 pounds.

He got 3 "Ec"'s - front legs, rear legs, and back

He got 1 "A" - shoulder assembly. The rest of the scores were usual.

"As for who to breed them to? You say whomever you wish. But not ZEPP0 ever again! His kids are too big." (From a customer who leases our bucks).

ZEPP0 has 72 registered kids as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPP0 is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.

The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPP0 dau's.

DIED FEBRUARY 2, 2019
S: YELSON- page 15

DS: SGCH RENOVATOR LA-92 Formerly Top of Elite Buck List
D:SGCH CAPRIKORN RENOV MEADOW VIOLET 10*M - 95th Percentile LA-92
Finished in only 4 shows, a total of 6 rings. An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. An Elite doe which strictly measures milk/fat/protein JRG percentile. He is longer and taller than other Saanen bucks with very sharp withers. He looks awesome from the side and he is too narrow viewed from the rear. In 2012 Ben Rupchis placed him first over the other "B" bucks (BULGING EYE, STARBY, BIZNES) in spite of the narrow rear end. His full sister also has a 92 just like his dam. She is also a SGCH, just like his dam. She also has 22,000 pounds lifetime and climbing.
UPDATE- AS OF HIS DEATH FEB 2019 HE WAS 10TH ALL-TIME ON THE DEC 2018 (Latest) ELITE BUCK LIST.
UPDATE - STILL 12 TH AS OF DEC 2020 USDA DHIA GENTIC EVALS

LA-90 VEEE

One Time Reserve Grand Champion - probably not a good judgment
Code 87 J, Code 90 EH
To get the biggest milk check, try using a buck whose dam is 99th Rank. But that is half the story, even better is if his sire is also ranked 99. YELSON is not ranked yet, but his dam was 99.

After disbudding, BULGING EYE's right eye was swollen and it protruded. Also he was a little lethargic. Maybe he is blind in that eye. He is very friendly. This is a very handsome buck. We used him on Cleanup on about 15 does we tried to breed in August. It always worried Scott that he is not hyper like his Dad. But the computer has him at plus 302 for milk in March 2017. The highest rating on the Elite Buck List is plus 244.

BULGING EYE may be too dairy. He needs to be hooked up with your normal dairy doe, who is not dairy enough, or even better, a fatso. (His dam was "skin", bones, and mammary.) But its hard to find a "fatso" here.

A lot of the top milk bucks were quite lean, bordering on frail. VOICE OF REASON was a string bean. Strange.
We bred him to 15 in Fall of 2014 and 25 in Fall 2015. And more in Fall 2016
We took BULGING EYE to his first show on Jun 8, 2014. He was first of three in Ring One, Second in Ring 2, First in Ring 3, and Third in Ring 4. In Ring One, he was Grand Champion versus 12.
In the 2016 3 Ring Buck Show he was Reserve to the Grand in all 3 rings.

DDD: CAPRIKORN CASH'S MY DIAMOND 3*M

DDDD: CAPRIKORN ICE FORCE 2*M LA-88 294 3680 117 3.2%

COBALT already has milking dau's at caprikorn, but not elsewhere.

So he cannot appear on the Elite Buck List because you need DHI records in two herds. His sister went for 2,600 and his brother went for \$2,395. So Alice jacked up the price because she would like to have a Rocket son for a change. Four in a row have been bought.

This was an awesome looking Baby buck. He had that sweeping look Judges love, starting from high sharp withers, travelling back along straight topline to a very good rump angle, being lower in the rump than the withers. Then he became a yearling. Ugly.

Secondly, ZURICH has a slight minus for PTAFS.

COBALT IS POSITIVE FOR FAT %! (In addition to huge milk)

At 2, we took him to his first show. We put him against our best looking 3 y.o.'s - BLUE, BOSS, and BULGING EYE.

There were 4 rings. He was Grand Champion versus 12 in 2 rings and Reserve Gr. Ch. in the other two. The following year, 2015 it took him 4 rings to finish. We said, in this list: "When he matures, he will go 91 at least."

COBALT's adgagenetics ratings as of June 2016 were Plus 176 PTAM, plus .07 Butterfat, minus .02 Protein. That would make him about #6 on the Elite Buck List. But he only has tested dau's in one herd.

Smh code j

update- as of Dec 2018 he would be number 5 or 6 if he had a dau on test in another herd.

When we bought him in Fall 2015 he was NUMBER ONE on the Elite Buck List. We knew that some of our bucks would eventually prove higher. But we were desperate for an outcross. We were too inbred. Scott always wanted an ELF descendant, but they kept ending up with only one udder half. He looks better than an 89 to Scott.

Ben Rupchis says:

"ECLIPSE improves - Stature, length of body, levelness of rump, rear udder height, dairyness, feet, pasterns, and rear leg angulation. His daughters are uniformly tall, long and dairy with excellent feet and legs.

Protect for - Milking speed, some slow milking daughters. Teat placement, teats occasionally on corners of udder. Body depth, daughters slow to develop barrels."

Scott says: Improves foreudders, teats are set too far out, but usually straight down."

Ended with Lifetime 1,396 days 15,575 pounds 2.8 b.f. 2.8 pro

Finished in only 4 shows, a total of 6 rings.

An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had ”INVERSION” - more protein than fat. We chose VIOLET’s twin VERN to breed the awesome does STARGATE P.33 and VENICE P.28a. Nine pounds at birth. We named the dam to honor Tina Gilchrist’s immortal GCH FOOTHILL FARM MEADOW SPRING TOP TEN LA 90. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. We don’t want to waste time on conformation but one item we do want is “The Big Arc”! We used to have big wide escutcheons. When CRUZERIO did 5100, totally smashing our previous record, everything became lined on her. Then we lost the Big Arc. SPRING’s descendants will bring it back. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It’s so easy to be the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein, all wrapped into one number called “percentile,” or “Rank”. VIOLET “HAD IT ALL”

It is very unusual for there to be two straight generations of 92's. There are very few Saanen 92's in any given

year.

That said the SGCH's and the Top Tens make HAWK a Spotlight Sale buck. But the sale is in Texas, not dairy country, this year. HAWK is longer than the other buck kids like his dam and her brother, MEADOW BOSS, one of our main herd sires.

This one hurt! MEADOW HAWK had a full brother, MEADOW HAWK 2. He got what we call "the Bulldog" - front shoulders loose, front legs crooked-bowing out, winging out. SALE BARN.

A \$5,000 hurt.

He is a wild Indian! His strengths are rear leg angulation and the classic Saanen head.

The major points would be:

BIANCHETTA is now the third Saanen doe in history to have **TWO** (2) 305 5000 lactations.

ECLIPSE IS NUMBER ONE, by far, on the Elite Buck list as of November 2018. Putting those two together, there is no telling how high HOPS could go!

WINSINGER is 90thile, and PTAFS plus 0.3

The downside is that HOPS has no tested daughters.update dec 2020
HOPS now #2 on DHIA Genetic Evals!

A second downside is that the son of a 90%ile may not help us.

The upside is that there is no telling just how high HOPS' rating could go! Same then for WINKEEPER, his son.

He was number one on the Elite Buck list when we bought him

Died February 20, 2016

When we bought him for \$3,500 plus transportation from California in fall 2015, we was NUMBER ONE on the Elite Buck List.

We knew that some of our bucks would eventually prove higher. Bu we were desperate for an outcross. We were too inbred. Scott always wanted and ELF descendant, but they kept ending up with only one udder half.

He looks better than an 89 to Scott.

Still milking at 10 years old SEPTEMBER 2016
Lifetime 2,497 days 27,299 lb and climbing. WOW!

Not only did she start early, 9 months of age, but very few does can do 2,900 ending at 8 ½ years old.

Her dau ANDROMEDA was 10th? yearling milker at National Show. What if we could develop a strain that always kidded at under one year?

WIARA, FORMERLY 97 Percentile rank, has fallen to 90th.

The USDA computer needs to learn how to give older does a break.

Her doe YIARA owned by Scarlett Payne.

Our other Top Ten that year was WIARA'S niece YIN YANG #821.

WIARA bred herself and kidded at 9 months of age! AND had a 16 lb test! WIARA is super friendly. WIARA had a PTA for stature of plus 9.9, which was bigger than the mature does. (MOOSE was a giant).

Our oldest doe as of February 2016 and TESTED PREGNANT! We use her son, NEW ERA, #424. And HERACLES will probably be our clean up buck this winter.

DD: SG CAPRIKORN KRUG'S STARGATE - page 59 - #1 in U.S.A. TWO DIFFERENT YEARS! (All breeds)

LA-90 & LA-89 & BUIS vs. 24 milkers

If your herd was averaging 11.7 like WIARA'S, your milk checks would go up by \$51,030 per year.

11.7 pounds here minus 9 pounds there equals 2.7 lbs per day times 150 does times 300 days times \$42/hundred weight equals \$51,030 more per year.

HERACLES does have a weakness - his dam's b.f.% ECLIPSE should bring that up, but not enough for it to be positive.

HERACLES has one rear foot that Scott calls a "rocker foot."

#424 - WIARA'S babies are friendly, have personality, and come up to you when you go into their pen.

HERACLES Big and Rangy, Excellent length. Shallow heels, good rear leg angulation. Clean front legs. Good to very good escutcheon. Good shoulders, excellent DC. Probably go 91 at 5 years old.

Extraordinarily friendly, inquisitive, and human like. We used him as the clean up buck on the main milking herd.

His descendants are an awesome choice for a herd that is commercial

and has some mixture of Alpines and Saanens because Scott used this buck heavily as the clean-up buck at Caprikorn Farms. So you know that he's got the milk. Starting in 2017 we became dismayed with the set of back pasterns. At Caprikorn we would rather have strong back pasterns and a not so pretty udders. If you have a mixed herd, the you probably have good back pasterns. We are Saanen breeders and we have always bred for strong back pasterns because all 120 Saanens that were brought into the U.S. had poor back pasterns.

CAPRIKORN HOT SPICE KING #8208 AS1961368

Born April 6, 2018

Late Kid

SS: CZARGATE

SSD: **STARGATE!!**

S: CAPRIKORN CZARGATE HOT ROCKS #669

In spite of his VERY MILKY PEDIGREE, HOT ROCKS is stuck down in the 75th percentile as of July 2020.

SD: FLORENCE - a 99TH %ile doe who was 4th lce milking Yearling at the national Show.

D: SG CAPRIKORN ZECRET CUMIN 3*M #276

CUMIN IS #1 ON THE USDA ELITE DOE LIST (STRICTLY MILK/FAT/PROTEIN) AS OF July 31, 2020 and she has been for several years in a row.

305 **5042**

Three milking dau's are in another herd on test.

So as soon as we get some milking at CAPRIKORN the USDA computer program will give him at rating. It would be tempting to guess his rating at half way between CUMIN's 99 and HOT ROCKS' 75.

But CUMIN's Reliability is 77 and HOT ROCKS is 46, so the weighted average is 90th percentile. The computer will speak in August of 2021 when the milk records of our three SPICE KING dau's get compared to their herd mates'.

04-08 324 4336 133 3.0% 112 2.6%

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide! "

DS: SG CAPRIKORN YELSON MEADOW BOSS *B; died February 2, 2019

He was longer and taller than other Saanen bucks with very sharp withers. He looked awesome from the side and he was too narrow viewed from the rear. In 2012 Ben Rupchis placed him first over the other "B" bucks (BULGING EYE, STARBY, BIZNES) in spite of the narrow rear end. His full sister also had a 92 just like his dam. She is also a SGCH, just like his dam. AS OF HIS DEATH FEB 2019 HE WAS 10TH ALL-TIME ON THE DEC 2018 (Latest) ELITE BUCK LIST.

D: SG CAPRIKORN BOSS CALEX2 11*M #2116 1614165 LA +VV+84 LA +EE+87

01-01 183 1247 59 4.7% 40 3.2% 3.2 is about the max for Saanens.

02-00 254 2767 125 4.5% 85 3.1%

02- 10 305 4019 **154** 3.8% 120 3.0% TOP TEN

She did not have a proper dry period or she would have done better.

Baby lactations don't usually tell us much, but LOOK AT CALEX2's FAT %! Thinks she's a Nubian.

There are only 18 does in the 99th percentile on the Dec. 2016 USDA-DHIA Genetic Evaluations.

Of those, CALEX2 has by far the highest fat %. LIFETIME FAT % 4.2.

DD: SGCH CAPRIKORN ZEPPA ALEX 10*M 99th %ile LA-92 TOP TEN

2-08 305 3788 134 3.5% 112 3.0%

3-07 305 4274 133 3.1% 125 2.9% TOP TEN

5-07 297 4080 144 3.6% 116 2.9% - 144 should make Top Ten again.

Reserve GCH vs. 13 at Leetown May 23, 2015

Grand vs 16 milkers AOP, then BEST IN SHOW AUGUST 10, 2015!

Scott & Alice forgot to bag up ALEX for Appraisal (she was milking through)

But they remembered a week later – BIS Next year 91 or 92, not 89.

BEST IN SHOW AGAIN SEPTEMBER 19, 2015

In Fall of 2020 he started shooting blanks and he had to go.
