Her twin above was bought for \$3,000 exactly. BIG!

Front legs angling out slightly.

One of the only 15 99th percentile does in the U. S. Is her right side a little slow?

The 904, 921, 922, etc. is their DHIA String Number.

More importantly, it's the number hanging around their neck. So when you come to shop you know who you're looking at.

See the number, see the price tag in this list. Like a Saanen Supermarket.

Showy? **Dairy farmers avoid**

PLAN was auction Wednesday, April 1, but we needed milk. She was Sale Barn Bound.
By September she is milking stronger with an EX mammary and the COBALT showy rump angle.

“Deep pedigree dam line starts small as yearlings grows up as 2 yo's”

BUYER'S TIP: GOTTA GIVE THE MILKING YEARLINGS TIME TO SEE IF THEY WILL COME AROUND.

The perfect 4-H doe. Going to kid early.

Dam 97th %ile and plus 0.7 PTAFS. Highest Rated #9XXX doe by our in house system.

Daughter of an LA 91, Local Cheese herself is a 91st percentile.

On Thanksgiving 2019, Scott said: “friendly, well built, stylish on move”

Once again in Fall 2021 Alice bred her too early so she will be stale for the August and September shows. The other side of the coin is that her kids will have the advantage of being early kids. Teats straight down, and coming from the correct spots on the mammary instead of out to the side like so many Saanens. Nice fore, nice rear. She is show-able and we have shown her but to be a totally killer show doe, the rear would have to be higher. LOCAL CHEESE is a doe we can build on for generations, if we live that long.

LITTLE KIM IS FRIENDLY! PRETTY MAMMARY..

SHOWY. But these are not show genes.

Out-milked all the other does born in 2019 in their first lactations.

But these are not great milk genes except for JARLSBURG.

Not worth the price. Just a show doe for Alice next year. She deserves one.

Last year we said: "A midget udder but it is built so well that we will keep her for a second freshening. Especially considering her dam is 99th %ile and good looking. Computer has her at 96%. She is one of the 3 youngest milking yearlings. Nice rear, no fore."

This year she is the third showiest 2 y o. But the milk is still too low for a dairy, which we are.

DOB: 03/24/2019 5163/1450 HONDURAS x HAZELNUT #646

We want to be honest with you at all times. This doe and her sister had three of the ugliest babies of 2020. #89 was so ugly Scott designated her to be sent to the sale barn, even though the big milk should be there.

LOVE NUT led the yearlings on our April 2020 test.

99th%ile. Her dam HAZELNUT 99. REL 51, means fairly well proven.

CONFIRMED PREGNANT BY LAB 11/16/22 Pregnant price \$

How do you compute at **99th %ile, the TOP RANK**, when your 01-09 305 is only 2538?

Well, first, have heavy milking relatives.

Next, have a lifetime 4.1% fat and 3.1% protein.

(3.2% protein is as high as Saanens go)

OH YES - and try freshening at 10 months of age and doing 2204 lbs in 305 days!

Update - If she follows the normal progression she will make Top Ten in fat.

Born Late

Which means they will be First Freshening Two Year Olds – a rarity at CAPRIKORN.
