## 2020 Does for Sale

February 12, 2024

In wp: 2020 Does for Sale

### **These are Does born in 2020.**

If you are shopping for other does, please open  
**“2018 DOES FOR SALE” plus “2019 DOES FOR SALE”**  
or **“2021 Does for Sale” or “2022 Does for Sale.”**

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

\*Contract2 is behind the button, “Order Forms,” on the website.

Or call us (301) 834-8030 and we will fill it out!

These prices change all the time. Once you make your deposit, **YOUR PRICE NEVER CHANGES.**

Until you make your deposit, you have no deal.

THANKS!!

*All of these doe kids HAVE been registered with ADGA.*

We don't do the listing until the papers come from ADGA.

(We can't get the paper from ADGA until we come up with a name that contains "M" and has something to do with her family.)

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her. (Unless she aborts.)

"131" – What does that mean? She is wearing a neck tag that says "131".

Also her left ear PERMANENT tattoo will read "131M".

The "M" means born 2020.

The "131" means she was the 131<sup>st</sup> kid born in 2020.

The 131 in 131M means she was the 131<sup>st</sup> kid born in 2020

“Reserved by \_\_\_\_\_” means **NOT**  
**AVAILABLE.**

Someone else has already put their money down.

If you'd like to be that someone next year when someone looks at these lists, **YOU** can reserve a baby in advance by going to “Advance Baby Sales.”

Thank you for looking!

DOB: 01/04/2020	3959/1065	WINKEEPER x CUMIN	

CUMIN has been NUMBER ONE for milk/fat/protein on the USDA List for about three years and we thought MARJORAM was our showiest Milking Yearling for the Nationals in July. . Furthermore, the fat percent of 3.9 and the protein percent of 3.0 are very strong, and depending on the dairy, would bring in as much money as a 3,000 lb doe with normal components.

*MARJORAM 99<sup>TH</sup> %ILE as of Aug.2022*

MARJORAM received the highest score for fore udder attachment on our 2023 Linear Appraisal. She was tied with NAUGHTY SPICE, who is also a CUMIN daughter.

Nice mammary for a yearling; rear not high enough. A beautiful doe, but there is a slight dip in the top line and the rear legs are a little too close which means the mammary is not as wide as we would like. And she's a little uneven.

-----------------	---------------------------	---	---------------

JOY STARR wa the showiest of the 99<sup>th</sup>%iles.

This doe's future buck kid is an amazing bargain for dairy farmers. Because she is radically outmilking the other does born in 2020, and yet the price of her kid is lower than some of *them!* Why? Because she has an extreme Nubian nose, which the Saanen breeders hate. However, Judge Rupchis placed MISS STAR 14<sup>th</sup> of 20 on 7/3/22.

Teats too small for our hand-milking customers, and nose too Roman for our Saanen customers.

Best looking out of 23 doe kids.

Hula #1 milker at Caprikorn two lactations in a row. 1 of the 4 best looking yearlings. A lovely wide mammary, teats pointing a little bit forward, not much. Swell rump angle for a yearling. But the nose is not quite a Saanen nose. It's a tad more roman than straight. Judge Rupchis makes her 4<sup>th</sup> out of our 16 2yo's on 7/3/22. However Paige Hohlstein reports her full sister not doing great.

DOB: 01/18/2020	779/495	ALEX x HIGHLEXA # 6177	

She has a Nubian nose!

Dam long teats.

She has waddles that grow from behind her ears!

Underpriced because she has a pronounced convex nose.

The Saanen Breed Standard is exactly this: "Disqualifications - Breed Specific: -erect ears-no other color but white or cream" So we are not allowed to kick her out of Saanens. However, Saanen Breeders greatly prefer dished or straight noses.

And overpriced because she is a linebred outcross. A very active doe which portends BIG milk.

Big Milk & Big Show, But not Mega Milk & Monster Show. Great Escutcheon.

A giant like her Dad.

Either slightly weak pasterns or sickle legged, take your choice.

**Formerly Reserved By Fecht**

On August 31, 2020, Scott said: "This is a really big doeling, the biggest of this years crop. But her rear pasterns are a little weak. Her offspring need to go into a mixed herd. In a mixed herd there will be Alpine and maybe some Nubian blood and the rear pasterns will be just fine. Also all of our bucks and all of their ancestors have strong pasterns so her offspring should be good. Find the offspring on Advanced Baby Sales." Rear legs are way too posty but her natural rear leg set is with the feet far, far apart and the mammary may be the best of all of the yearlings. And she's huge.

Aug 31, 2022 update: Alice & Scott love her. The judges don't. "Not enough STYLE."

Pasterns are fine. Biggest doe in the herd and 85<sup>th</sup> %ile.

Looking really good.

Overpriced. 3<sup>rd</sup> of 7 / 6<sup>th</sup> of 16

On Oct 8, 2022 Scott said "it's a fabulous body and she has the top line that the show folks like. She has the massive ribbing that we milk folks like. We tell you all the bad things as well as the good things, and when she has been milked out, the teats are pointing out badly enough so that they can rub on the inside of the legs, although not really horribly like some does. Also her back feet turn out which is annoying but it probably helps with the big escutcheon that she has. On the plus side there seems to be a pretty decent foreudder extension and she's very friendly and sometimes her natural stance shows us a really excellent escutcheon width between the hocks."

On March 26, 2023 Scott said "It's really a fabulous mammary socked up. Lots of fore 1/3 1/3 but, the problem is the teats are set too far out. They also point out slightly rubbing against the rear legs."
