## 2022 Does for Sale

September 13, 2022

In cf/wp: 2022 Does for Sale

### These are Doelings born in 2022.

If you are shopping for older does, please open  
“DOES FOR SALE, 2019 DOES FOR SALE” **OR much BETTER,**  
“2020 DOES FOR SALE” plus “2021 DOES FOR SALE”

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

\*Contract2 is behind the button, “Order Forms,” on the website.

Or call us (301) 834-8030 and we will fill it out!

### ***ATTENTION PLEASE!***

*We are going to change these prices soon!*

*These prices change all the time. Once you make your deposit, your price never changes. Until you make your deposit, you have no deal.*

THANKS!!

We can't get the paper from ADGA until we come up with a name that contains "P" and has something to do with her family.

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her (unless she aborts.)

"231" – What does that mean? She is wearing a neck tag that says "231."

Also her left ear PERMANENT tattoo will read "31P."

The "P" means born 2022.

The "231" means she was the 31<sup>st</sup> kid born in 2022.

The first digit in her tag -2- just means she was born in 2 0 2 2

*WHY ARE PERCENTILES MORE IMPORTANT THAN TOP TEN?*

*We have a whole long article that explains that. Call if you want one. But here's something we can say in two sentences:*

*"LOOK AT THE ASTERISKS! (On the Top Ten List) The computer is telling you that it sees a weird 'deviation.'"*

*Here's something else we can say in two sentences:*

*"Top Ten measures Management.  
Rank, or percentiles, measures GENETICS."*

*You can't buy management but you CAN buy genes.*

*All of these doe kids HAVE been registered with ADGA.*

If we have time to put the page numbers on, that's where you find her dam in the particular Family.

The Families are on the Net behind the button: "Our Doe Families."

ZEPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it. ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's. Also the 2017 305 Milk & Fat Awards, and the 2017 Lifetime Awards.

Two of the three in this get are too narrow in Rear End Assembly for Scott. Blaming WINKEEPER. If you spent some time looking at this doe, you'd see her almost as a show kid. But we tell you all the bad things. Her brother, #215 and her sister, #216 had rear end assemblies that caused Alice and Scott separately to anguish when they saw them. So the genes for that trait are not good. The sire, WIN, has done this before and we don't use him anymore, even though his grand-dam broke 5,000 lbs. You wouldn't notice that the rear end assembly was narrow on this kid and she will certainly be bred to someone who has a big escutcheon.

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99<sup>TH</sup> PERCENTILE!!

Because she has great lactations? NO!

Because the computer knows the lactations of all her relatives and they are beating their herdmates.

FROMAGE 99<sup>TH</sup> percentile GENETICALLY!

01-00 305 2476 83 3.4% 77 3.1%

02-00 286 2314 89 3.8% 76 3.3%

03-00 305 3227 117 3.6% 102 3.2%

No use looking at her lactations, one side of mammary ruined. Computer knows her relatives. So computer knows her percentile is 98!! Better genes than 49 of 50 Saanens. Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have a lot of kids left here and they are doing great for us.

You may ask "how does the computer give this doe a 99% based on those lactations, which are nothing special for CAPRIKORN?"

The answer is that the computer knows all of her RELATIVES' lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right.

ZEPP0 is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx.

BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPP0 dau's.
