## 2023 Bucks for Sale

March 3, 2024

In CF/wp: 2023\_Bucks\_for\_Sale

*We believe all of these buck kids will have a negative CL test as soon as we can draw blood and ship it.  
(meaning they are clean)*

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

\*Contract2 is behind the button, "Order Forms," on the website.  
Or call us (301) 834-8030 and we will fill it out!

THANKS!!

## TABLE OF CONTENTS

Here is a list of the 2023 bucks, listed in birthday order.

Warning: CAPRIKORN yearling bucks are usually ugly.  
Pretty as babies. Very handsome as older bucks.

<u>NAME</u>	<u>TAG #</u>	<u>BORN</u>	<u>PRICE</u>
CAPRIKORN LOBOT RUDYARD dam: #1158                  sum 1107	301	01/03/23	\$1,995 <b>RESERVED B Y PERRY</b>

“Reserved by \_\_\_\_\_” means **NOT AVAILABLE**.

Someone else has already put their money down.

If you’d like to be *that someone* next year when someone else looks at these lists, YOU can reserve a baby in advance by going to “Advance Baby Sales.”

Thank you for looking!

We use the term “**Percentile**” or “Rank” or “%ile” frequently – *What does that mean?*

All of the does on test in the U.S. are linked by the USDA computers.

If the doe has big numbers but all the other does in her “management group” ALSO have big numbers, the doe is not highly rated by the USDA.

If the doe has weak numbers but every one of her relatives has strong numbers *compared to their management groups*, the doe **IS** highly rated.

**PERCENTILE is the only number you can count on for YOUR HERD.**

a NUMBER LIKE 4500 POUNDS is about 45% determined by how good the management was when the doe made the record, 35% determined by how good the owner was at cheating on test, and 20% how much milk/fat/protein the doe actually has.

\*\*\*\*\*

**A dairy farmer wrote in with the question:**

“Is it really worth paying more for the more expensive buck?”

**Scott wrote back, in Spring 2016:**

“The answer is I don’t know.

Here is one dollar and cents approach I thought of.

There are 16 **99th** %ile does. The average PTAM of those 16 is 333.

There are 16 **95th** %ile does. The average PTAM of those 16 is 230.

So it looks like for every one percentile drop the milk goes down by 26 pounds. HENOOSKI had a dam with a PTAM of a 93 so that would be 6 percentiles down from HAN SHOT FIRST.

26 pounds times 6 percentiles = 156 lb /year. So that would mean on average his daughters will give you 156 less pounds every year, year after year. And his granddaughters will give you one - half of 156 pounds year after year. So if you are milking 80, then  $80 \times 26 \times 7 \times .41/\text{pound} = \$5,970$

80 does x 156 pounds = 12,480 pounds per year.

12,480 pounds per year @ \$40cwt = \$4,992.

5 years of milk from each doe equals \$24,960.

That’s my guess.”

\*\*\*\*\*

A lot of work needs to be done to make this computation more accurate.

First, what about the granddaughters and great granddaughters?

Nothing was added to the \$24,960 for them.

Second, probably starting by comparing the 99<sup>th</sup> percentile to the 95<sup>th</sup> percentile is not right. Because the 99<sup>th</sup> percentile will have a few that are REALLY crazy for milk.

So, if we found 16 does in 85<sup>th</sup> percentile and averaged their milk (PTAM). Then subtracted that number from 230, which is the average for the 16 in the 95<sup>th</sup> percentile. That would give us the drop for 10 percentiles. Dividing that by 10 would probably give us a more accurate figure than 26 pounds per percentile.

\*\*\*\*\*

## TESTIMONIALS

“The Caprikorn does are amazing. They so out class the rest of the herd it’s not funny.”

*-Trent Hendricks, MO*

“A big congratulations to your TOP TEN DOES last year. I keep reading on and on and kept seeing all your listed. Yea Caprikorn!”

*-Tom & Roni, CA*

“We have 144 CAPRIKORN HOT SAUCE daughters. The YEARLINGS from him tower over a lot of the older does.”

*Keith from New England*

“We LOVE our Caprikorn Farm goats – they are not only very productive, they are lovely personalities – smart, but not overly pushy.”

*-Bedford Blueberry Goat Farm, MA*

“I would say you are probably the top herd in the nation now with those classification scores and that milk production.”

*-Janelle Anderson, 30-year Saanen Breeder, NE*

“Our KID ROCK daughters are milking 10 pounds at 10 months of age!”

*-Emanuel Schneider, PA*

“By the way, HOT ROD is doing great. His girls have had their first kids. He definitely improved our genetic pool.”

*-Andrea Gauvreau, Quebec*

“Scott, bought seven does from OK. Had never seen such milk or quality in a goat herd. When asked about the genetics he said they were Caprikorn.”

“They are doing 18 pounds a day. The yearlings are doing 13 pounds a day.”

*-Thomas Childress, Hereford Breeder, TX*

“I am overly pleased with EARTHMAN and the improvements that I can already see that he has made to our farm.”

*-Wendy, Bootleg Farm, GA*

“My name is Shereen and I bought a buck from you a couple years ago. Fantastic buck - I love this buck!”

*- Shereen Wilcox, PA*

“We have 105 does..Just so you know the Caprikorns are the nicest and largest ones. We can always pick them out just by looking at them.”

*-Lori Lyons, WI*

“Dear Scott, that is some Sales List! I know your goats are the BEST!”

*-Brad Parker, Pipe Dreams Fromage, PA*

“Hey Scott, I got to milk some of your best goats when Alice was here; was impressed!”

*-Levi Petersheim, IA*

“The Caprikorn girls are doing FANTASTIC! They are exceeding our expectations. They are always coming in with full bags and they don’t want to slow down production very quickly when it is time to start drying up.”

*-Jared Rebling, Brighton, IA*

“AMBER is a milk machine. I appreciate the temperament of all your goats; they are so nice and loving!”

*-Scarlett Payne, Utica, OH*

“A lot of the ones we have from your bucks freshened at 11 months and they’re just fantastic.”

*-Keith Tiffit, VT*

“DILL and DYLEX are **amazing**, and as milking yearlings were amazing also...”

*-Lila Streff, SD*

“I appreciate that you are willing to refund our deposits; we have decided to back out of all 11 dairy goat kids.”

*- Trisha Bickel, Hamburg, PA*

“I have appraised all the major Saanen herds and you have the best feet and legs.”

*-Linear Appraiser, American Dairy Goat Assn., 2013*

“I am so very glad to be able to work with you as you are one of the most reliable and honest goat breeders I know. It is such a pleasure to have complete confidence in a purchase to know that it will be totally as represented.”

*-Teddy West, OH*

\*\*\*\*\*

The 95<sup>th</sup> percentile does average **243** per PTAM.

The 98<sup>th</sup> percentile does average **302** per PTAM.

Increase of 59 pounds per year.

There are 3 percentage points between 95 & 98.

Therefore each percentile translates into **20** pounds of milk per doe per year.

So, for example, if you have a normal non-tested herd, that MIGHT be 40<sup>th</sup> percentile.

If you use 90<sup>th</sup> percentile bucks, you move up by 1,000 pounds per doe per year.  
(20 pounds times 50 percentiles)

If you are getting \$53 cwt, your income goes up by \$39,000 for every 100 does you milk.

Young Stock Final Score "V"(Just missed Ec)

**#3 All-time on the USDA Top Buck List** DEC 2016 LA-90 #11 on Dec

ZEPPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it. ZEPPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's. Also the 2017 Milk & Fat Awards, and the 2017 Lifetime Awards.

Anyone could have reserved RUDYARD in advance for \$985. But they couldn't let go of that \$100 REFUNDABLE deposit. Then his dam beat the whole herd except one on the February 17, 2023 test. On March 30<sup>th</sup> Scott said: "This might be the best rear leg set of any of this years bucks, AND his dam has big protein, AND he is very friendly. Walks right up to you!"

The USDA computer has NEXT BOOK at 98<sup>nd</sup> percentile. That computer program undervalues protein. So probably NEXT BOOK is actually 99<sup>th</sup>.

We always have to go out to get an out-cross buck. If we don't, the herd becomes too inbred, losing size and production, as well as creating other problems. So each year, Scott goes through the USDA records, focusing on the 99<sup>th</sup> %ile does and writes letters asking "Is (name) still alive? If so, who is she bred to? How much are you asking for the first buck kid?" One year, we were fortunate enough to find SARAH in California. Not only was she a 99<sup>th</sup> %ile doe but she also had an LA-91.

We reserved a son from her before he was born and that turned out to be ZEPPO.

**#3 All-time on the USDA Top Buck List** DEC 2016 LA-90 #11 on Dec

ZEPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's.

Also the 2017 305 Milk & Fat Awards, and the 2017 Lifetime Awards.

D: CAPRIKORN JARLS MISS STAR #27

DD: CAPRIKORN ZURICH JOY STAR #759 **LA-91!** A very strange doe. All her relatives are VERY highly rated. She herself is 97<sup>th</sup> %ile, but all her lactations are weak.

A 99<sup>th</sup> %ile doe - MISS STAR - bred to the son of the #1 doe in the US - NUKE - A.K.A. NUCLEUS. KASHTA's not only 99<sup>th</sup>, she's the VERY TOP of the 99<sup>th</sup>.

On February 17, 2023, Scott said about 323: "Finally, the escutcheon I've been waiting for!"

On the minus side, we foundered MISS STAR. Walking on her front knees, she will never again turn in a bomb lactation.

In her 2-yo lactation she was leading the entire herd when we foundered her.

Scott says: "RISING STAR IS A BARGAIN because his dam MISS STAR actually has more milk than her records will ever show!"

It's not HER fault we foundered her.

March, 2015 one ear still down and folded. One of the appraiser's only 3 Ec kids on July 28, 2015. Best built of the three in Scott's opinion; has beautiful udder. 2016: Leetown Show, she beat our best looking yearlings in all 3 rings under 3 different judges. July 4<sup>th</sup>, 2016 **4th place milking yearling at Nationals**. July 4th 2016 ½ of the 2ND Place dam and dau at Nationals. She had it all. 99th PERCENTILE! Big butterfat. 4th place Milking yearling at Nationals.

SDD: CAPRIKORN YELSON CHEYENNE

**D: SEE NEXT PAGE**

On February 17, 2023, Scott said: "328 was the best looking kid in a pen of 10; very friendly."

Anyone could have made a \$149 **REFUNDABLE** deposit on REZTAR before or after he was born. And if he was a girl, or if he was ugly, we would have immediately refunded the deposit.

Finally Scott checked him out. He looked **great**, and the price is now \$1,000 higher.

DDD: SG CAPRIKORN RENOV'S ZTARGATE 2\*M top ten – 98%

EZTAR 4\*M TOP TEN was the Appraiser's #3 doe kid and EZZTAR was his #4. Out of about 60 does. Years ago we said: "They are certain to have awesome milk, especially COMPONENTS." EZTAR has a very nice rump angle which comes from her granddam SGCH CAPRIKORN RAMESES VVS1, LA -91 2x and 6 3,000+ lactations.

We actually showed her as a 3 y o in three rings and she was last in two of them but the competition was two great show herds- Scotty Broaddus - ARABY, and Janice Kessler - C CREEK SAANENS.

Summer of 2019-As a five year old we dragged EZTAR out again and she won her very small class every time August 3. The judge in the last show was a dairy farmer and made her RESERVE GRAND CHAMPION over JWALA! She beat all the two year olds for that lactation.

November 2016 - EZTAR 4\*M TOP TEN is a 99<sup>th</sup> percentile doe, but so are 16 other Saanens in the U. S. But look at her components! They are positive, whereas most of the 99<sup>th</sup> percentile does are negative. OUR DAIRY FARMERS GET PAID BY FAT AND PROTEIN. At least, almost all of them. On adgagenetics the computer prints A 2:1 RATIO. EZTAR #479 has the highest one in the country as of January 2 2018 at 243. She and her doe kids will always stay at CAPRIKORN unless someone pays a huge price.

Ben Rupchis reserved EZTAR's 2021 Buck Kid in advance.

She has the rump angle show people love. In her first outing, she was so unhappy being led into the show ring that she ran the entire length of the Howard County Fairgrounds, approximately 600 meters!

Went Reserve again on August 13, 2021. Versus at least ten each time.

DD: SG CAPRIKORN STARBY EXTRACT - see previous page. **#3 Doe in U.S.**

On February 17, 2023, Scott said: "332 was the second-best looking kid in a pen of 10."

His dam almost made 4,000 as a 2yo.

Her dam DID make 4,000 as a 2yo!

We are using the son of EXTRACT heavily this fall (2023).

There are 16 99<sup>th</sup> %ile does, but 14 of them are not built as well as HAZELNUT.

Her lactations would be higher if she were not shown so often.

He looks about as good as you want a dairy buck to look. Strong, well-angulated rear legs and a decent Rump Angle on the move.

HAZELNUT was treated unfairly in the DHI records. When we discovered that her tag (#646) had been put on a yearling. The yearling's tattoo was 66N and the person that found the tags on the ground did the best he could.

When you consider that, at the Maryland Dairy Goat Association big summer show, HAZELNUT's daughter went Grand and HAZELNUT went Reserve. So you see RISOTTO is the buck for the kind of buyer who is looking for more milk, yes, but also wants good looking milkers.

04-01 659 **8661** 337 255

NOVELLA was our second showiest yearling and she is 97<sup>th</sup> %ile. So that we are always honest with you,  
our "2<sup>nd</sup> showiest yearling" is maybe going to be the "4<sup>th</sup> or 5<sup>th</sup>" showiest yearling in a National Show herd.  
We don't breed for show. BUT it tells you that you will have a VERY nice mammary and a doe that lasts  
for more years than most..

Up until this spot on the list, you may notice that we used LOBOT heavily.

What's up with that?

We had to bring in outside bucks. They made our Rear End Assemblies too narrow for Scott, the "Big Arc" freak.

Ben Rupchis once said "Perhaps the best Rear Udder Arc of any doe of any breed" about ZTARTREK.

Also, the Appraisers numbers of all her relatives give her PLUS 2.3!

We do give up some milk as her rating has dropped from 99 to 88. Maybe LOBOT will bring it back up. Of course ZEPPO is half the story and his RUA is plus 0.8.

99%ile  
THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99<sup>TH</sup>  
PERCENTILE!!  
Because she has great lactations? NO! Because the computer knows the lactations of all  
her relatives and they are beating their herdmates. FROMAGE 99<sup>TH</sup> percentile  
GENETICALLY!  
01-00 305 2476 83 3.4% 77 3.1%  
02-00 286 2314 89 3.8% 76 3.3%  
03-00 305 3227 117 3.6% 102 3.2%  
No use looking at her lactations, one side of mammary ruined. Computer knows her  
relatives. So computer knows her percentile is 98!! Better genes than 49 of 50 Saanens.  
Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have  
a lot of kids left here and they are doing great for us.

She has the highest protein of any doe in the U.S.

And we are moving towards more protein, even if we have to give up some milk.

And thanks to COBALT, she is much better looking than her dam.

The Mammary is still probably not going to impress the kind of appraiser who is basically a 4-H  
Judge. There is not the wide area of attachment.

We are using RENNET heavily this Fall, but you can buy him.

01-08 341 3327 140 4.2% 106 3.1%  
02-09 302 4456 203 4.5% 148 3.3% \*

\*previously Scott believed that if a Saanen went over 3.2% protein, it was a lab error.

DS: WINKEEPER \*B a proven buck with numbers that could be enough to be #4 in the U.S.  
plus 331 milk.  
D: CAPRIKORN KOLO'S PROMENADE #217  
DD: CAPRIKORN J2 KOLO 5\*M #834 Highest PTI in the U.S.  
J2 KOLO is 98<sup>th</sup> %ile. She has the big arc that we want. Mr. Conlan placed her first  
over 17 yearlings in November.  
DDD: HULA 305 days 5,000 lb.

Positives:

We were using her full brother PROUD TANGO 215 as a herd sire. PROMENADE beat  
the other yearlings on her very first DHI test.

Negatives:

1. Scott does not like teats being that far out (probably ok for the judges.)
2. In the old days we never sold a buck from a first freshener.

Positive:

NEZTAR may fix that. CZTAR's test placement is positive 0.4.  
LEEANN's is positive 2.0.  
HOLT's is positive 1.2.

Negative:

The udder does not milk down to nothing. It is so big that it looks like it is BEFORE  
milking when it is AFTER milking.

Positive:

Tests plenty long for our hand milkers.

05-02 315 3336 111 3.3% 96 2.9%

This is the heaviest milking herd in the country; CUMIN beat the whole herd 3 years in a row.

The dam is only 93<sup>rd</sup>ile. That means more milk/fat/protein than 93 out of 100 **tested** Saanens.

He could be "the one" but she has a fabulous rear and is the dam of our top show doe.

REESES IS a linebreeding on STARGATE.

Most of the Saanen teats are either positioned too far out or stick too far out. KANDY'S are perfectly placed. KANDY'S milk, fat and protein could be way higher then 92 but she has been bagged 8 times for show.

NET SPICE was Jim Conlan & Ben Rupchis's first place out of 10 yearling bucks.

PTAFS. Feet were not scored high.

D: SGCH CAPRIKORN ZURICH HALLOUMI 7\*M #634 99<sup>th</sup> percentile LA-92  
HALLOUMI is the showiest of the yearlings as of June 2017.  
Therefore her kids are overpriced from the perspective of a commercial dairy farmer. On August 4, 2018,  
even though she was only a 2-year-old, the judge made HALLOUMI Grand over an AOP class of around  
17 does. September 15, 2018 - HALLOUMI goes Grand vs. 14 for her second Leg.  
HALLOUMI gets dragged out to five shows a year by Alice. One per month in the Summer. Each time  
her DHI projection drops because she is bagged up. Surely she would have more than one 4,000lb lactation  
to her name if we had a different show doe in her age class.

2-00 289 3269 121 3.7% 100 3.0%

On track for 4,000 as a 3 yo, but got deathly sick. She came back next year and;

3-11 331 4,947 165 3.3% 146 3.0%

**5-00 305 5,093** 190 3.7% 150 3.0%

DD: FROMAGE 99<sup>th</sup>ile

TA DA -August 2021

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99<sup>th</sup> PERCENTILE!

Because she has great lactations?

NO!

Because the computer knows the lactations of all her relatives and they are beating their herdmates.

FROMAGE 99<sup>th</sup> percentile GENETICALLY!

01-00 305 2476 83 3.4% 77 3.1%

02-00 286 2314 89 3.8% 76 3.3%

03-00 305 3227 117 3.6% 102 3.2%

No use looking at her lactations, one side of mammary ruined. Computer knows her relatives. So the computer knows her percentile is 99!! Better genes than 99 of 100 Saanens. Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have a lot of kids left here and they are doing great for us.

You may ask "how does the computer give this doe a 99% based on those lactations, which are nothing special for CAPRIKORN?"

The answer is that the computer knows all of her RELATIVES' lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right.

DDD: XTORT

32,444 lb lifetime.

Style, but loose shoulders, friendly. In April 2017, we said “Very nice looking mammary maybe EX” And in fact the Appraiser did go with “E.” WE WILL TAKE ALL THE DONUT DAUGHTERS WE CAN GET. In September 2016 the beautiful mammary was a perfect size - for a mature doe. We said “What that means is this awesome doe’s kids will be a good deal for dairymen. Because the mammary will grow too big for the American Show Goat Assn scorecard by the time she is two. So she will never have the really high placing that drives the prices up.”

code smh 85 ks 90BB

In August of 2017, the judge at the Howard County Fair made FUSILLI Best Udder versus around 15 does. But not Grand. On August 3, 2018 a different judge exactly the same thing. That should give you a profile of what FUSILLI looks like. *Consistent with yearling appraisal scores above*

She isn't going to make 4,000 so we need a Dairy Farmer that wants:

1. beautiful udder and
2. **4.0%** lifetime b.f.

HER SON WOULD BE PERFECT FOR ONE OF OUR CUSTOMERS THAT SELLS FLUID MILK!

*Cause guess what ? High fat tastes gooooooooooooood!*

To be fair she has been our Aged Doe Entry at 4 shows a year for about three years. So all that bagging up has definitely hurt her total milk production. AND her two dau's on the next page PROVE that she has the milk and the USDA computer knows that and makes her 98<sup>th</sup> percentile - MORE MILK/FAT/PROTEIN than 49 out of 50 TESTED Saanens!

NEWS FLASH! GRAND vs 10 at a little county Fair Show on August 13, 2021 quickly followed by LA-91 on August 21<sup>st</sup>. BUYER'S TIP: KEEP THAT SLOPEY RUMPED DOE WITH THE FAB MAMMARY. The RA gets better with every year of age.

NEWS FLASH #2 - FUSILLI defeats Anne McKeever's great show doe EILEEN and goes on to become RESERVE GRAND CHAMPION versus 17 Saanen Milkers on June 4, 2023 at the MDGA Spring Show.

Judge Katie Wolf put EKORIAup as our showiest doe kid out of around 70. And the judges at the  
Memorial Day show in Leetown agreed with her.

She led all our yearlings in milk and protein after first five tests.

The mammary is NOT pretty so this was a great chance for a dairy farmer to get a son of hers at a very  
reasonable price. She has the body. Her close relatives have nice udders. Her son KLINGON beat the  
other 2 year old bucks for conformation on June 14, 2020.

The last DHI test of the year for us in 2016 was October 15. EKORIA was number ONE in the entire  
herd. The first DHI test for us in 2017 was March 9, and again EKORIA was number ONE out of all of  
the milkers! On her first test of 2020 she beat them all again as a six-year-old!

On March 30<sup>th</sup>, 2022 at the age of 8 years old EKORIA dropped an amazing 23.2 pounds on official DHI  
test.

Out of 22 milking yearlings, her two dau's were highest and third on the September 21, 2023 DHI Test.  
On May 21 2023 EKORIA kidded at nine years old. Something happened and she when down. Her legs  
were thrashing and she could not get up. Scott thought it was a stroke. Several times Scott dragged her  
and made her walk a little. Then, SHE WALKED BY HERSELF! Back to the Milking Herd! Skin and  
Bones. Tester came. 3 pounds. Urggh. Next month - **10.4 pounds!**

**On Sept 22, '23 we had twenty two milking yearlings on test. The two daughters of  
EKORIA, PANAKA, AND PANAKKA were first & third place does at the milk production  
that day.**

©Scott Hoyman

# Basic Stuff - Introduction

(Rev. 07/7/2022)

CF/wp: INTRODUCTION (in "sales2thru10" folder)

We are not a show herd. We breed for milk/fat/protein.

Thank you for your interest! We have the heaviest milking herd in the United States.

What's different about Caprikorn Saanens? **THEY MILK MORE THAN ANY U.S. HERD.**

For our foundation stock we used Top Ten does and sons of Top Ten milkers. Then we spent 43 years Official DHI testing and discarding.

We also breed for strong back pasterns, ease of kidding, and **FRIENDLINESS**. All of our goats descend from Top Ten does.

The Caprikorn kid you order will probably radically out-milk any other kid you ever buy.

What else is different? About 20 years ago we started breeding for components instead of just milk. Now, a lot of them have a hefty butterfat percent and protein percent. Especially **PROTEIN**.

Your kids are hand-raised C. A. E. Free. They get milk **FOUR** times a day!

Since 1977, we have adhered to a "Full Refund on Return Policy." You do not need to think of a reason to return your animal for a full refund. Unlike most other breeders, Caprikorn Farms does **NOT** reserve the right to keep kids – **you get the kid you reserve even if it turns out to be the best kid of the crop.**

We have a 4-H discount of 15% and a \$50 rebate program for when the first official DHIR lactation is completed.

We welcome visits from buyers (especially at milking time). Feel Free to **BRING YOUR SCALE AND WEIGH THE MILK FOR YOURSELF!** Please contact us anytime if you would like further details on any of our animals.

Farm Phone (301) 834-8030

**Shoppers are welcome to drop by any time!**

**\*\*\*\*BREEDING\*\*\*\***

It's so easy to be #1. The other Saanen breeders have to breed for white hair, concave noses, erect ears, etc. All we have to do is be true to the Percentiles (also called Ranks) derived from our DHI records.

We have been on DHI since 1976, gradually moving up in production one generation at a time.

### **\*\*\* SHIPPING \*\*\***

Kids can go by plane. Others must go by land or sea.

We pay for vet fees and shipping papers. It costs \$85 to get your kid to the airport, AND HANG AROUND WHILE Air Freight checks the weather at your airport to see if your high is going to be over 80 degrees F. The plane ticket and kennel are your costs. Extra vet fees for export are \$275. We have to deal with 6 veterinarians for export.

Usually someone you know is going to the Convention or the National Show.

#### ***Previously the situation was –***

Either your regional airport has United Airlines or they don't. The other airlines are too expensive. Three recent tickets were \$247 San Francisco, \$226 Minneapolis and \$219 Tampa, but it requires split second timing. We say the kid is 8 weeks when it is just 4 weeks old. They quote us a \$300 (medium) crate price. When we arrive, they sometimes make us get a \$400 (large) but they let us pay the quoted price. United Airlines typically ships to any U.S. Airport that does cargo. The only way to find this out is to call and make a reservation and see if they have a plane with enough room.

<b>WEIGHT</b>	<b>RATE (*rates are subject to change at any time)</b>
10-50 LBS	\$259
51-70 LBS	\$314
71-100 LBS	\$384

#### ***Now the situation is – Call Delta Air Freight***

We charge you \$60 to \$100.00 for the shipping kennel. Whatever it costs us. When returning the crate, you unscrew the screws and put them in a ziploc bag, tape the bag of screws to the inside of the top, turn the top upside down, tape the 2 halves together with duct tape, and take the crate to any UPS place. Or Greyhound. When we get the crate back, we send your purchase price back.

OR, if you want to own a kennel, that works much better. You can call Pet Smart (1-800-872-3773) and give them your credit card number. You want a "Great Choice Dog Carrier - 32" L x 22.5" W x 24" H," IF YOUR KID IS STILL 4 WEEKS, WHICH IS THE EARLIEST WE SHIP.

Or, if you already own a kennel, you can ship it to us.

If you delay paying for your kid, your kid will get bigger. The air freight airline cost increases from \$239-\$349, and the kennel cost increases as well because you need a "large." With a doe, around six to seven weeks is where your kid moves up to a "large" crate and that plane ticket can jump up to \$289. If you wait around long enough, some airports and planes cannot handle the Extra Large crate.

These days we also have to buy something called an "Airline Kit" which is around \$10.

Or you pay us 75 cents per mile round trip.

### **\*\*\* GLOSSARY \*\*\***

What does S: mean? Sire (Father)

What does D: mean? Dam (Mother)

What does SG mean? Superior Genetics

What does GCH mean? Grand Champion

What does SGCH mean? Both of the above

SG, GCH, and SGCH are pretty much meaningless initials dreamed up by the American Dairy Goat Association.

The SG designation is an especially poorly conceived award recently invented by the Board of Directors of ADGA instead of the scientists. If the doe is in the 86<sup>th</sup> percentile she gets SG. If more LA's and DHI tests come in and she drops to the 26<sup>th</sup> she is still SG. But 26<sup>th</sup> means 3 out of 4 Saanens are better than the doe. Is that "superior?"

The scorecard      This is the point system that underlies what the ADGA judges are looking for. Considering it has no scientific studies to support it, the scorecard does a pretty good job of predicting longevity.

But what CAPRIKORN is after is **PROFITABILITY**, not LONGEVITY.

According to the July 2020 issue of HOARD'S DAIRYMAN Page 390, "The average productive life for a dairy cow in the U. S. is 2.8 lactations."

Loose Shoulders:      Are your does housed in a few acres? Loose Shoulders means this doe is at a bargain price FOR YOU. (Because the Show People hate them, so the price is lower). Are your does being "pastured out"? Do they walk long distances? Loose Shoulders are a disaster for you.

Top Buck:              same thing as "Elite Buck" and "Sire Summary"

Elite Buck:              same thing as "Sire Summary." 85<sup>th</sup> thru 99<sup>th</sup> %ile are called Elite. The USDA computer program comes up with "Top Buck". It appears on the cdcb.us website.

Elite Doe:              95<sup>th</sup> through 99<sup>th</sup>

%ile:                      abbreviation for percentile.  
Imagine a stack of 100 pennies. Top penny is 99. Bottom penny is zero.

Rank:                      same thing as percentile.

The important scientific numbers are Percentile and PTAM - developed by USDA scientists and in use by thousands of serious cow dairymen. The "Bull Proof" numbers.

First a computer sets everyone to "Mature Equivalent." Then each doe is compared to the does IN THE HERD that kidded around the same time. The doe already has a score from her sire and dam's score. The computer changes the doe's score up OR DOWN depending on how much milk/fat/protein she gives compared to her herd mates. Then it finds all her relatives on test anywhere in the US and adjusts her score some more.

How much can a percentile change? In other words, how wrong can it turn out to be? That depends on the REL. In practical terms, a Saanen with an REL of 70 or up will never change by more than 5 points. For example, your 85% ile doe with an REL 73 COULD REALLY be a 90%ile or he/she could REALLY be an 80<sup>th</sup> %ile. But 9 out of 10 times he/she is REALLY 87, 86, 85, 84 or 83. Now with an REL of 36 or, or less, he/she could REALLY be almost ANYTHING.

PTAM:                      Predicted Transmitting Ability Milk

What does 01-09 305 2500 70 2.8% 75 3.0% mean?

Starting at 1 yr and 9 months of age the doe, in 305 days, made 2500 pounds of milk and 70 pounds of butterfat. (Seventy divided by 2500 is 2.8%.) 305 days is the standard measurement. She made 75 pounds of protein.  
We use real “Standard DHI Testing” - Just like cows. BE AWARE THAT ADGA NOW ALLOWS PEOPLE TO INVENT THEIR OWN RECORDS!!

b.f.: Butterfat

American Saanens: The Togg Top Ten is on page 25 of the March 2015 *United Caprine News*. Only number one with 4190 would have a chance at making Saanen Top Ten. Number 2 at 3620 is way out of range. The Oberhasli Top ten is on page 20 of the July 2017 *United Caprine News*. The 1<sup>st</sup> place doe milked 1-11 305 3810. The 2<sup>nd</sup> place doe milked 4-11 305 3030. The 3810 cannot come close to making Saanen Top Ten.

VEEV: General Appearance: Very Good  
Body Capacity: **E** for Excellence  
Dairy Character: **E** For Excellent  
Mammary: **V** for Very Good  
Beneath V for Very Good comes “+” for “Good Plus”

LA: Linear Appraisal.  
The American Dairy Goat Association has a free booklet explaining the program. Most Appraisers are dairymen, so they have a little better value system than plain old judges. But in 2016 ADGA ran out of dairy farmers that wanted to do the job, so they put a 4-H type judge in to fill the need. Still, the LA “ideal ranges” were selected by senior judges, not by computer programs that had the milk records built in. So, it is still a bunch of old wives tales with no scientific studies to back it up.  
Take your big powerful ugly **money-making** doe that barely loses to a small beauty queen with a perfect small mammary in the show ring. The big doe has a chance to get a HIGHER Appraisal score than the show queen mini. But, if the big doe’s udder has a tilt, forget it. She will be 8 to 10 points lower than “Mini”.

In 2015 we had to hire 9 people to work at Caprikorn to do LA, and we paid ADGA \$1,295 for a single day. Another year when Eric came, we paid ADGA \$2,000 for a single day of his work. But we got a lot of PTAs and that data still impacts today’s PTAs.

Hopefully all these LA sessions mean that your mega milker will live longer and bring in more milk check money or cheese.

What does V Ec Ec Ec mean? That is a “Young Stock Appraisal” score. In 2016, ADGA stopped doing babies. General Appearance V body Capacity Ec Dairy Character Ec Overall=Ec Note: different categories than LA above. The 4th letter in LA for big goats is not “Overall.” It’s “Mammary.”

ADGA = American Dairy Goat Association  
DHI = Dairy Herd Improvement  
MDIA = Maryland Dairy Improvement Association  
CGS = Canadian Goat Society  
NSBA = National Saanen Breeders Association  
DGSA = Dairy Goat Society of Australia

What does Scott mean by an ADGA “NSBA Type Doe”? “SHOW and milk”

NSBA stands for **National Saanen Breeders Association**. Every member is different. But the AVERAGE member is: SERIOUS about breeding, willing to lose money to improve their herd. has a different source of income than goats, says they breed for “show and milk,” dreams of winning the National Show, usually win their local show(s), believes in the importance of DHI but often has a set of

reasons why they cannot do it, chooses their next herd sire based on his relatives' show wins, but if two buck kids are available and very close in show will choose the milkier one, HAS NEVER MADE A SINGLE BREEDING BASED ON B.F% OR PROTEIN %, can place a class almost as well or even better than a licensed judge, participates in Linear Appraisal, knows the strong points and weak points conformationally of each of their Saanens, will get rid of a doe that has black color or roman nose or droopy ears even if she milks GREAT, and has an average of about 20 Saanens. Now, 6 or so of them are commercial herds. Different.

#### SAANENS vs. LAMANCHAS

As a Dairy Farmer, you have to be aware that only TWO out of about 35 Directors of the American Dairy Goat Association are actually commercial dairy farmers. The rest breed for show. Page 4 of the United Caprine News for June of 2020 published the ADGA LaMancha Top Ten Records. The number 1 doe did 4,170 lbs in 304 days. That record won't even come close to making the last place on the Saanen Top Ten, which will usually be around 4,400 lbs! See also AMERICAN SAANENS above.

#### “PUREBRED” vs. “AMERICAN” vs “GRADE”

In 2016, ADGA registered 33,500 dairy goats. Only 3,800 were Saanens. Almost none of them were “Purebred Saanens.” Almost all of them were “American Saanens.” Very few were “Grades.”

ADGA stands for American Dairy Goat Association.

ADGA has about 35 Directors. They are hobbyists with full-time jobs not in goats. Or they are full-time in goats but their spouses have “real” jobs. They are breeding for BEAUTY, not milk/fat/protein.
