2023 Does for Sale

February 19, 2024

In cf/wp: 2023_Does_for_Sale

These are Doelings born in 2023.

If you are shopping for older does, please open

“2020 DOES FOR SALE” OR much BETTER,

“2021 DOES FOR SALE” plus “2022 DOES FOR SALE”

As of February 19th we are suspending sales because we need the milk for our own milk shipments. We will be back in March, when more of our does are scheduled to freshen!!

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

*Contract2 is behind the button, “Order Forms,” on the website.

Or call us (301) 834-8030 and we will fill it out!

ATTENTION PLEASE!

We are going to change these prices soon!

*These prices change all the time. **Once you make your deposit, your price never changes.** Until you make your deposit, you have no deal. THANKS!!*

“Reserved by _____” means **NOT**
AVAILABLE.

Someone else has already put their money down.

If you'd like to be that someone next year when someone looks at these lists, YOU can reserve a baby in advance by going to “Advance Baby Sales.”

Thank you for looking!

What will they think of next?

20 years ago, I was at a show in Ohio and a man came up and introduced himself to me. He said: “thanks for sending me your sales list. I have to do chores and milking before I go to work in the morning. I couldn't buy any of your goats because they give so much milk that I would be late for work.”

We can't get the paper from ADGA until we come up with a name that contains "R" and has something to do with her family.

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her (unless she aborts.)

"331" – What does that mean? She is wearing a neck tag that says "331."

Also her left ear PERMANENT tattoo will read "31R."

The "R" means born 2023.

The "331" means she was the 31st kid born in 2023.

The first digit in her tag -3- just means she was born in 2 0 2 3

WHY ARE PERCENTILES MORE IMPORTANT THAN TOP TEN?

We have a whole long article that explains that. Call if you want one. But here's something we can say in two sentences:

"LOOK AT THE ASTERISKS! (On the Top Ten List) The computer is telling you that it sees a weird 'deviation.'"

**EVERY SAANEN ON THE TOP TEN LIST HAS AN
ASTERISK - EXCEPT THE CAPRIKORNS**

Here's something else we can say in two sentences:

*"Top Ten measures Management.
Rank, or percentiles, measures GENETICS."*

*You can't buy management but you **CAN** buy genes.*

All of these doelings HAVE been registered with ADGA.

If we have time to put the page numbers on, that's where you find her dam in the particular Family.

DARK CREAM! NOT WHITE! (That means none of the traditional Saanen breeders will want ROSEMARY.) NAUGHTY SPICE has made 5,000 lb in 305 days. She also has the highest PTAM in the USA., 100 lbs higher then the second doe. NAUGHTY SPICE'S dam CUMIN did the same. *If ROSEMARY gives you a buck kid, he will throw more milk than your current herd sire.* We are using her full brother RAISSIN as our main herd sire in Fall 2024.

ZEPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's.

Also the 2017 305 Milk & Fat Awards, and the 2017 Lifetime Awards.

We always have to go out to get an out-cross buck. If we don't, the herd becomes too inbred, losing size and production, as well as creating other problems. So each year, Scott goes through the USDA records, focusing on the 99th %ile does and writes letters asking "Is (name) still alive? If so, who is she bred to? How much are you asking for the first buck kid?" One year, we were fortunate enough to find SARAH in California. Not only was she a 99th %ile doe but she also had an LA-91. We reserved a son from her before he was born and that turned out to be ZEPPO.

We chose the CLINTON son out of the PRIME RATE daughter. The sire of your new buck kid is half the story! The Saanen breed as a whole has come a long way up production-wise since the days of the famous old bucks.

It’s hard to tell how much milk NOBLE STAR has because she has been bagged tight 8 times for shows. Bagging tight always lowers production.

EZTAR 4*M TOP TEN was the Appraiser's #3 doe kid and her full sister EZZTAR was his #4. Out of about 60 does. Years ago we said: "They are certain to have awesome milk, especially COMPONENTS." EZTAR has a very nice rump angle which comes from her granddam SGCH CAPRIKORN RAMESES VVS1, LA -91 2x and 6 3,000+ lactations.

We actually showed EZTAR as a 3 y o in three rings and she was last in two of them but the competition was two great show herds- Scotty Broaddus (araby) and Janice Kessler - C CREEK SAANENS.

Summer of 2019-As a five year old we dragged her out again and she won her very small class every time on August 3. The judge in the last show was a dairy farmer and made her RESERVE GRAND CHAMPION over JWALA!.

RAZTAR is Scott's choice for a serious Saanen breeder that would also like to ship milk profitably.

Not ugly; not a show doe...YET! Rump angle will flatten with age. Shallow heels.

On December 1, 2023 Scott said " Has some style, also shoulder motion, & the big arc.

ZEPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's.

You may ask "how does the computer give this doe a 98% based on those lactations?" the answer is that the computer knows all of her RELATIVES' lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right. Now this is a half sister of CUMIN.

ZEPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's.

updating this, we don't expect her to do 4,000 even though the computer thinks that. Because seven year olds don't keep going like younger does do.

Both HABANERO and HARISSA 99th %ile as of June 2020.

HABANERO's buck kid #8206 was by far the best looking baby buck. Scott mourned when he let him go for only \$1,995. But the repeat buyer had bought many Saanens from us so the buyer deserved a reward.

When you do the math as explained in "Elite" on the ADGA website as of December 2019, HABANERO has the highest total score. That means she has the genes to bring in more of a milk check than any doe in the US.

HALLOUMI is the showiest of the yearlings as of June 2017.
Therefore her kids are overpriced from the perspective of a commercial dairy farmer. On August 4, 2018, even though she was only a 2-year-old, the judge made HALLOUMI Grand over an AOP class of around 17 does. September 15, 2018 - HALLOUMI goes Grand vs. 14 for her second Leg.
HALLOUMI gets dragged out to five shows a year by Alice. One per month in the Summer. Each time her DHI projection drops because she is bagged up. Surely she would have a 4,000lb lactation to her name if we had a different show doe in her age class.

This doe's future buck kid is an amazing bargain for dairy farmers. Because she is radically outmilking the other does born in 2020, and yet the price of her kid is lower than some of *them!* Why? ZEPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's.

HABANERO's buck kid #8206 was by far the best looking baby buck. Scott mourned when he let him go to the Dominican Republic for only \$1,995. But the buyer bought a lot of Saanen so the buyer deserved a reward.

PAVO was bought before she had time to have a lactation on test.
