2024 Does for Sale

March 3, 2024

In NEW CF/2024: 2024_Does_for_Sale

These are Doelings born in 2024.

If you are shopping for older does, please open
“2021 DOES FOR SALE” **OR** much **BETTER**,
“2022 DOES FOR SALE” **plus** “2023 DOES FOR SALE”

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

*Contract2 is behind the button, “Order Forms,” on the website.

Or call us (301) 834-8030 and we will fill it out!

ATTENTION PLEASE!

We are going to change these prices soon!

*These prices change all the time. **Once you make your deposit, your price never changes.** Until you make your deposit, you have no deal.*

THANKS!!

“Reserved by _____” means NOT
AVAILABLE.

Someone else has already put their money down.

If you’d like to be that someone next year when someone looks
at these lists, YOU can reserve a baby in advance by going to
“Advance Baby Sales.”

Thank you for looking!

What will they think of next?

20 years ago, I was at a show in Ohio and a man came up and introduced himself to me. He said: “thanks for sending me your sales list. I have to do chores and milking before I go to work in the morning. I couldn’t buy any of your goats because they give so much milk that I would be late for work.”

We can't get the paper from ADGA until we come up with a name that contains "S" and has something to do with her family.

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her (unless she aborts.)

"431" – What does that mean? She is wearing a neck tag that says "431."

Also her left ear PERMANENT tattoo will read "31S."

The "S" means born 2024.

The "431" means she was the 31st kid born in 2024.

The first digit in her tag -4- just means she was born in 2 0 2 4

WHY ARE PERCENTILES MORE IMPORTANT THAN TOP TEN?

We have a whole long article that explains that. Call if you want one. But here's something we can say in two sentences:

"LOOK AT THE ASTERISKS! (On the Top Ten List) The computer is telling you that it sees a weird 'deviation.'"

**EVERY SAANEN ON THE TOP TEN LIST HAS AN
ASTERISK - EXCEPT THE CAPRIKORNS**

Here's something else we can say in two sentences:

*"Top Ten measures Management.
Rank, or percentiles, measures GENETICS."*

*You can't buy management but you **CAN** buy genes.*

All of these doelings HAVE been registered with ADGA.

If we have time to put the page numbers on, that's where you find her dam in the particular Family.

The USDA formula with the CDCB computer uses to develop percentiles is fabulous.

Yet it is not perfect. The weighing of butterfat is too high and the weighing of protein is too low.

You may ask “how does the computer give this doe a 98% based on those lactations?” the answer is that the computer knows all of her RELATIVES’ lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right. Now this is a half sister of CUMIN.

No use looking at her lactations, one side of mammary ruined. Computer knows her
relatives. So computer knows her percentile is 98!! Better genes than 49 of 50 Saanens.
Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have
a lot of kids left here and they are doing great for us.

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99TH %ile!!
Because she has great lactations? NO! Because the computer knows the lactations of all
her relatives and they are beating their herdmates. FROMAGE 99TH percentile
GENETICALLY!
01-00 305 2476 83 3.4% 77 3.1%
02-00 286 2314 89 3.8% 76 3.3%
03-00 305 3227 117 3.6% 102 3.2%
No use looking at her lactations, one side of mammary ruined. Computer knows her
relatives. So computer knows her percentile is 98!! Better genes than 49 of 50 Saanens.
Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have
a lot of kids left here and they are doing great for us.

You may ask "how does the computer give this doe a 98% based on those lactations?" the answer is that the computer knows all of her RELATIVES' lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right. Now this is a half sister of CUMIN.
