2024 Does for Sale

April 5, 2024

In NEW CF/2024: 2024_Does_for_Sale

These are Doelings born in 2024.

If you are shopping for older does, please open

**“2021 DOES FOR SALE” OR much BETTER,
“2022 DOES FOR SALE” plus “2023 DOES FOR SALE”**

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

*Contract2 is behind the button, “Order Forms,” on the website.

Or call us (301) 834-8030 and we will fill it out!

ATTENTION PLEASE!

We are going to change these prices soon!

*These prices change all the time. **Once you make your deposit, your price never changes.** Until you make your deposit, you have no deal.*

THANKS!!

Member: ADGA DHIA NSBA CGS MDIA IGA MDGA DGSA

“Reserved by _____” means **NOT AVAILABLE.**

Someone else has already put their money down.

If you’d like to be that someone next year when someone looks at these lists, **YOU** can reserve a baby in advance by going to “Advance Baby Sales.”

Thank you for looking!

What will they think of next?

20 years ago, I was at a show in Ohio and a man came up and introduced himself to me. He said: “thanks for sending me your sales list. I have to do chores and milking before I go to work in the morning. I couldn’t buy any of your goats because they give so much milk that I would be late for work.”

We can't get the paper from ADGA until we come up with a name that contains "S" and has something to do with her family.

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her (unless she aborts.)

"431" – What does that mean? She is wearing a neck tag that says "431."

Also her left ear PERMANENT tattoo will read "31S."

The "S" means born 2024.

The "431" means she was the 31st kid born in 2024.

The first digit in her tag -4- just means she was born in 2 0 2 4

WHY ARE PERCENTILES MORE IMPORTANT THAN TOP TEN?

We have a whole long article that explains that. Call if you want one. But here's something we can say in two sentences:

"LOOK AT THE ASTERISKS! (On the Top Ten List) The computer is telling you that it sees a weird 'deviation.'"

**EVERY SAANEN ON THE TOP TEN LIST HAS AN
ASTERISK - EXCEPT THE CAPRIKORNS**

Here's something else we can say in two sentences:

"Top Ten measures Management.

Rank, or percentiles, measures GENETICS."

*You can't buy management but you **CAN** buy genes.*

All of these doelings HAVE been registered with ADGA.

If we have time to put the page numbers on, that's where you find her dam in the particular Family.

You may ask “how does the computer give this doe a 98% based on those lactations?” the answer is that the computer knows all of her RELATIVES’ lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right. Now this is a half sister of CUMIN.

03-00 305 3227 117 3.6% 102 3.2%

You may ask "how does the computer give this doe a 98% based on those lactations?" the answer is that the computer knows all of her RELATIVES' lactations. It is measuring her GENES. So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right. Now this is a half sister of CUMIN.

0-11 305 2270 101 4.4% 72 3.2%
2-00 289 3269 121 3.7% 100 3.0%

On track for 4,000 as a 3 yo, but got deathly sick. She came back next year and;

3-11 331 4,947 165 3.3% 146 3.0%
5-00 305 5,093 190 3.7% 150 3.0%

DD: FROMAGE 99thile

TA DA -August 2021

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99th PERCENTILE!

Because she has great lactations?

NO!

Because the computer knows the lactations of all her relatives and they are beating their
herdmates.

FROMAGE 99th percentile GENETICALLY!

01-00 305 2476 83 3.4% 77 3.1%
02-00 286 2314 89 3.8% 76 3.3%
03-00 305 3227 117 3.6% 102 3.2%

No use looking at her lactations, one side of mammary ruined. Computer knows her relatives. So
the computer knows her percentile is 99!! Better genes than 99 of 100 Saanens. Most dairy
farmers don't understand "GENES." So they don't buy her kids. So we have a lot of kids left
here and they are doing great for us.

You may ask "how does the computer give this doe a 99% based on those lactations, which are
nothing special for CAPRIKORN?"

The answer is that the computer knows all of her RELATIVES' lactations. It is measuring her
GENES. So her OWN lactations hold her score down, but the relatives are so good the computer
knows she could do better if she had both halves working right.
