**A dairy farmer wrote in with the question:**

“Is it really worth paying more for the more expensive buck?”

**Scott wrote back, in Spring 2016:**

“The answer is I don’t know.

Here is one dollar and cents approach I thought of.

There are 16 **99th** %ile does. The average PTAM of those 16 is 333.

There are 16 **95th** %ile does. The average PTAM of those 16 is 230.

So it looks like for every one percentile drop the milk goes down by 26 pounds. HENOOSKI had a dam with a PTAM of a 93 so that would be 6 percentiles down from HAN SHOT FIRST.

26 pounds times 6 percentiles = 156 lb /year. So that would mean on average his daughters will give you 156 less pounds every year, year after year. And his granddaughters will give you one - half of 156 pounds year after year. So if you are milking 80, then  $80 \times 26 \times 7 \times .41/\text{pound} = \$5,970$

80 does x 156 pounds = 12,480 pounds per year.

12,480 pounds per year @ \$40cwt = \$4,992.

5 years of milk from each doe equals \$24,960.

That’s my guess.”

\*\*\*\*\*

A lot of work needs to be done to make this computation more accurate.

First, what about the granddaughters and great granddaughters?

Nothing was added to the \$24,960 for them.

Second, probably starting by comparing the 99<sup>th</sup> percentile to the 95<sup>th</sup> percentile is not right. Because the 99<sup>th</sup> percentile will have a few that are REALLY crazy for milk.

So, if we found 16 does in 85<sup>th</sup> percentile and averaged their milk (PTAM). Then subtracted that number from 230, which is the average for the 16 in the 95<sup>th</sup> percentile. That would give us the drop for 10 percentiles. Dividing that by 10 would probably give us a more accurate figure than 26 pounds per percentile.

## TESTIMONIALS

“The Caprikorn does are amazing. They so out class the rest of the herd it’s not funny.”

*-Trent Hendricks, MO*

“A big congratulations to your TOP TEN DOES last year. I keep reading on and on and kept seeing all your listed. Yea Caprikorn!”

*-Tom & Roni, CA*

“We have 144 CAPRIKORN HOT SAUCE daughters. The YEARLINGS from him tower over a lot of the older does.”

*Keith from New England*

“We LOVE our Caprikorn Farm goats – they are not only very productive, they are lovely personalities – smart, but not overly pushy.”

*-Bedford Blueberry Goat Farm, MA*

“I would say you are probably the top herd in the nation now with those classification scores and that milk production.”

*-Janelle Anderson, 30-year Saanen Breeder, NE*

“Our KID ROCK daughters are milking 10 pounds at 10 months of age!”

*-Emanual Schneider, PA*

“By the way, HOT ROD is doing great. His girls have had their first kids. He definitely improved our genetic pool.”

*-Andrea Gauvreau, Quebec*

“Scott, bought seven does from OK. Had never seen such milk or quality in a goat herd. When asked about the genetics he said they were Caprikorn.”

“They are doing 18 pounds a day. The yearlings are doing 13 pounds a day.”

*-Thomas Childress, Hereford Breeder, TX*

“I am overly pleased with EARTHMAN and the improvements that I can already see that he has made to our farm.”

*-Wendy, Bootleg Farm, GA*

“My name is Shereen and I bought a buck from you a couple years ago. Fantastic buck - I love this buck!”

*- Shereen Wilcox, PA*

“We have 105 does..Just so you know the Caprikorns are the nicest and largest ones. We can always pick them out just by looking at them.”

*-Lori Lyons, WI*

“Dear Scott, that is some Sales List! I know your goats are the BEST!”

*-Brad Parker, Pipe Dreams Fromage, PA*

“Hey Scott, I got to milk some of your best goats when Alice was here; was impressed!”

*-Levi Petersheim, IA*

“The Caprikorn girls are doing FANTASTIC! They are exceeding our expectations. They are always coming in with full bags and they don’t want to slow down production very quickly when it is time to start drying up.”

*-Jared Rebling, Brighton, IA*

“AMBER is a milk machine. I appreciate the temperament of all your goats; they are so nice and loving!”

*-Scarlett Payne, Utica, OH*

“A lot of the ones we have from your bucks freshened at 11 months and they’re just fantastic.”

*-Keith Tiffi, VT*

“DILL and DYLEX are **amazing**, and as milking yearlings were amazing also...”

*-Lila Streff, SD*

“I appreciate that you are willing to refund our deposits; we have decided to back out of all 11 dairy goat kids.”

*- Trisha Bickel, Hamburg, PA*

“I have appraised all the major Saanen herds and you have the best feet and legs.”

*-Linear Appraiser, American Dairy Goat Assn., 2013*

“I am so very glad to be able to work with you as you are one of the most reliable and honest goat breeders I know. It is such a pleasure to have complete confidence in a purchase to know that it will be totally as represented.”

*-Teddy West, OH*

\*\*\*\*\*

The **95<sup>th</sup>** percentile does average **243** per PTAM.

The **98<sup>th</sup>** percentile does average **302** per PTAM.

Increase of **59** pounds per year.

There are **3** percentage points between **95 & 98**.

Therefore each percentile translates into **20** pounds of milk per doe per year.

So, for example, if you have a normal non-tested herd, that MIGHT be **40<sup>th</sup>** percentile.

If you use **90<sup>th</sup>** percentile bucks, you move up by **1,000** pounds per doe per year.  
(**20** pounds times **50** percentiles)

If you are getting **\$53** cwt, your income goes up by **\$39,000** for every **100** does you milk.

#3 All-time on the USDA Top Buck List DEC 2016 LA-90

ZEPPO has 46 registered dau's as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.

The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's

VERY FRIENDLY. Big Strong Doe. "If she were mine, I'd send her down the road." Linear Appraiser. That was before she freshened. In 2013 the Appraiser gave the mammary an E. In 2015 she only got a V. . BAR's profile is very simple. She has a beautiful mammary and body. She has big milk/fat/protein genes ALSO. So WHY IS SHE AND HER KIDS A GREAT DEAL FOR DAIRY FARMERS? Pure and simple - the topline has a dip. We have shown her. Maybe she could have won if she were not up against BOLIVIA from our herd and the C- Creek 3 y.o., one of the best looking 3 y.o.'s in the U.S. Her son EXAM, #461, beat the other two yearling bucks in all four rings, June 13, 2015. And in one ring the judge made him **Reserve Grand Champion** versus eleven Saanen bucks. At 5 her pasterns are starting to weaken. Urrgh, But we have so many 90's that can also do 4,000 that we will sell her sons cheap. We used her son HIGH BAIL until he was bought.

COBALT was a fundamental part of our breeding program. His sister went for 2,600 and his brother went for 2,395 This was an awesome looking baby buck. He had that sweeping look judge's love, starting from high sharp withers, traveling back along straight topline to aa excellent rump angle, being lower in the rump than the withers. One place Scott can fault him is the rump could be wider. Cobalt is plus for type. His PTAM, PTAF and PTAP% would make him about the equivalent of 95%ile. But although he has 24 registered dau's none have ever been on a test in a DIFFERENT herd than CAPRIKORN. So he does not print on the Top Buck (cbcd.us) or Elite Buck lists. IT IS RARE FOR A 95th %ILE BUCK TO ALSO BE POSITIVE FOR TYPE.

3-11 3927 151 3.9% 122 3.1% outstanding components

Scott cut KURD's price in half when HALLOUMI only did 13.6 on her first 2018 test. And down another 1,500 when her second test was 13.8. On August 4, 2018, even though she was only a 2-year-old, the judge made HALLOUMI Grand over an AOP class of around 17 does.

HALLOUMI got dragged out to five shows a year by Alice. Each time her DHI projection drops because she is bagged up. She would have a 4,000lb lactation if we had a different show doe in her age class.

On June 15, 2021 Jim Conlan placed 8 2018 (3-year-old) bucks here and put KURD first.

So Scott raised him by \$500 and took Jim's 7<sup>th</sup> place (888) down by \$500.

An ELITE DOE (which strictly measures milk/fat/protein genes). VIOLET had "INVERSION" - more protein than fat. We chose VIOLET's twin VERN to breed the awesome does STARGATE and VENICE Nine pounds at birth. We had named VIOLET'S dam to honor Tina Gilchrist's immortal GCH FOOTHILL FARM MEADOW SPRING TOP TEN LA 90. Dam had the big arc 35. And Rear Udder height: 38. Dam had extra teat. VIOLET started life with the RENOV steep rump. That changed. Her picture is on the website in front of the NYMPHIE (MEADOW ) Family.

We don't want to waste time on conformation but one item we do want is "The Big Arc"! We used to have big wide escutcheons. As of November 2012, Violets lifetime was 1,396 days 15,575 milk. She had cream, not white hair and an undesirable Saanen nose. It's so easy to be

the top Saanen milk herd. The other breeders select for color and noses. We can just keep selecting for milk/fat/protein, all wrapped into one number called “percentile,” or “Rank”.  
VIOLET “HAD IT ALL”

It is very unusual for there to be two straight generations of 92's. There are very few Saanen 92's in any given year. On August 1, 2018 Scott said, “This is a beautiful vigorous buck with a lovely top line and big width up front. His negative is that his rear end assembly is too narrow and he is too hocky. A lot of the look of his close relative MEADOW BOSS is here. But the family keeps coming with 92's so it appears that the rear end narrow doesn't get passed on to female offspring. Will be looking hard at his first few daughters as they freshen to see if this trait is showing up.”

On June 14, 2020 a very good ADGA judge placed 18 SENIOR bucks ( no kids) at CAPRIKORN and she made HAWK Reserve Grand Champion. So maybe Scott is a little too demanding when it comes to escutcheons in bucks. Or maybe the ADGA scorecard is wrong.
