0-11	305	1810	55	54					

STARGATE had a PTAM of 386. At that time the highest Elite Buck was 385. MANDELLA purchased by CAPRIKORN at the '99 Spotlight Sale for \$1,300. CONSTANTINE'S grandmothers were the Reserve National Champion and THE National Champion. We are lucky he has a positive PTAM. Most show goats DON'T! The 92 is tied for the highest Saanen buck score ever. MANDELLA freshened with an udder hard as a bowling ball. Even the teats were like stone. Scott would have given her a "93" no problem. Alice says "No." Laid back, unassuming, matter of fact, and just kept eating. Eating at 2 a.m. when the others were lying around. ONE OF 13 SAANENS ALL TIME WITH OVER 5,000 POUNDS IN 305 DAYS. And a smashing first lactation from a doe that kidded at 1yr 8 months of age! Shown once, 3<sup>rd</sup> of 5. Shown 2<sup>nd</sup> time, RGCH to ROMANCE p.30. Shown 9/17/05, 3<sup>rd</sup> of 4. 4<sup>th</sup> time out GCH vs 14 over Diana Patton's entries and also DREAMCATCHER, the 2<sup>nd</sup> place National Show doe, on 5/27/06. 5<sup>th</sup> show 3<sup>rd</sup> of 7 same day. 6<sup>th</sup> show 2<sup>nd</sup> over Nelson Broaddus. Her full brother ROAD SHOW was also a 90! We didn't believe the Official Testers 21.0 so we weighed her exactly 6 hours after milking and got 5 lbs 7.5 oz. STARGATE BEST UDDER at 2006 District III Saanen Specialty over 24 Milking Does!

S: SGCH RENOVATOR AI ++\*B LA-92 formerly #1 on Sire Summary! Now "inactive."

D: SG STARGATE 1\*M! – previous page - our best doe ever. The pride of the herd.

ZTARGATE, 97<sup>th</sup>ile, HAS THE LONGER TEATS FOR OUR HANDMILKING HERDS. And is more powerful, smarter, and extremely friendly. But ZTARTREK excels her in style and sharpness and vigor. ZTARTREK'S mammary is close to perfect with the exception that the teats point a little forward. Also as she ages it is getting uneven. A fair question, if you are a potential buyer is: "When I see the difference between these sisters lactations, how can ZTARGATE be a 97? ZTARTREK is far above her and is only two points higher." The answer is that the computer is using ALL of the lactations of ALL the relatives. So the computer is saying it is possible that next lactation ZTARGATE may outmilk ZTARTREK. And that many times a ZTARGATE descendant will outmilk a ZTARTREK descendant. ZTARGATE's dau CZARGATE is milking\_awesome - 99<sup>th</sup> percentile.

BUYER'S TIP: Next time you have your pick between litter sisters- if you are breeding for milk- take the one that runs around the most. ZTARGATE failed to kid in 2011. Bad. Her mammary - not pretty. Teats pointing forward. BUT LA E. ZTARGATE aborted for the fall of 2012. Got very sick in summer of 2015 but came back into milk. ZTARTREK – you have to wonder what ZTARTREK would REALLY have milked if we hadn't hauled her out to Colorado and back for the National Show. Also, a better dry period. Also hauled her to Minnesota and back for another Nat'ls. Her last? You can also see ZTARTREKS's huge area of attachment on her video: Video:

[www.caprikornfarms.com/ztartrek.shtml](http://www.caprikornfarms.com/ztartrek.shtml)

"ZTARTREK has perhaps the most impressive rear udder arch I have seen on any doe, in any breed. And tight toes."-Ben Rupchis. "And you can quote me." ZTARTREK's 2013 Buck was bought for \$3,400. ZTARTREK'S 2015 buck kid was bought for \$6,995. She didn't kid in 2016. Still not pregnant Feb. 2017. June 14, 2014 - ZTARTREK RES GCH versus 18 Milkers. Tested pregnant by HERCULES November 2017! But those kids never delivered.. code smh 89 ks - ZTARGATE

ZTARTREK was STILL MILKING ON HER 10<sup>TH</sup> BIRTHDAY!

281 3992 TOP TEN

Full sister of ZTARTREK - our best doe? Or is it her dau CASSIOPEIA?

DD: SG STARGATE 1\*M page 1 of this family

#1 ON TOP TEN TWO DIFFERENT YEARS and tops over ALL BREEDS  
TWO 5,000 LB LACTATIONS!

Look at the butterfat Change! What's up with the lab? 10 tests every lactation. It can't be luck.

Radically out milked the other yearlings. Also the third showiest.

When you see her mammary from the rear, it really grabs you if you are a Dairy Farmer. An awesome baby lactation. Where is the 4.0 fat coming from?? TIP-In buying stock, you can depend on MILK breeding truer than FAT. But %iles (RANK) is more reliable.

For a dairy farmer that gets paid by components, and cares a little about build, but not too much,,

CZTAR IS ABOUT AS GOOD AS IT GETS. THE SAME IS TRUE OF HER DAU EZTAR 4\*M TOP TEN BELOW. All does have flaws. For starters, none of them appraise at 100. Not even 96, 97, 98, or 99.

We paid to ship a son of a doe from the West Coast to Caprikorn just because that doe had 144 in fat..

Now here we have a home brew with 157. And 171

The computer knows that her two dau's - EZTAR and EZZTAR are milking awesome. Both also 99<sup>th</sup>%ile. Both of CZTAR's 2018 buck kids started to wing out so we sent them to the sale barn for a loss of \$7,595. We took her to a show for the first time in 2018 and the judge in one of the two rings made her RESERVE!! (over 12) We don't think of her as showy, but *She has some genes for looks being plus 0.4 PTAFS AND a PTI of 254, 5<sup>th</sup> highest of any Saanen.*

BUYERS TIP: IF YOU ARE A WORKING DAIRY, WHEN THEY ARE IN THEIR 6 YO LACTATION, IT MAY BE TIME TO THINK ABOUT SAYING GOOD BYE.

Smh 90 code J!

Old CZTAR is starting to get skinny at 8. But she will still whack a younger doe with a sideways head butt at the overcrowded hay feeder.

November 2016 - EZTAR 4\*M TOP TEN is a 99<sup>th</sup> percentile doe, but so are 16 other Saanens in the U.S. But look at her components! They are positive, whereas most of the 99<sup>th</sup> percentile does are negative. OUR DAIRY FARMERS GET PAID BY FAT AND PROTEIN. At least, almost all of them. On adgagenetics the computer prints A 2:1 RATIO. EZTAR #479 has the highest one in the country as of January 2 2018 at 243. She and her doe kids will always stay at CAPRIKORN unless someone pays a huge price.

Code smh 89 & 84 ks higher #'s BB  
Ben Rupchis reserved EZTAR's 2021 Buck Kid in advance.

Her genetic rating would be even higher except for her full sister's scores. The high school kids switched the numbers years ago without us knowing. They put 400 doe on a doe called EMAZENE and they put EMACENE'S number on EZTAR's.

The Saanens have nothing to do and they like to try to get rid of their numbers and their collars so some lucky person thought they were buying EMAZENE, a less expensive doe.

Years later whe we gave up on #480, EZZTAR, we read her tattoo. She was EMAZENE all along.

So EMAZENE's poorer lacements were credited to EZZTAR. That lowers the genetic score for EZZTAR's sire and dam. That, in turn, lowers the genetic score for EZTAR, #479.

\*\*\*\*\*

S: SG ZEPPO LA-90 Elite Buck List formerly #7 on the latest USDA Top Buck List.

SD: SG SILLY SARAH 5\*M 99Rank, LA-91

DS: SGCH RENOVATOR ++\*B Elite Buck

D: SG ZTARTREK 2\*M 99%ile – p.60

DD: SG STARGATE 1\*M - our best doe ever

She is one of our friendliest goats. She is a giant. CASSIOPEIA #292 was our showiest yearling milker.

If five judges placed the herd in May 2016, at least 4 would agree that CASSIE IS OUR SHOWIEST

doe. One buyer signed up to pay \$8,495 for her. But her kid was reserved to a different buyer.

TIP:

\*\*\*Basic Bob says “OK, your catalogue keeps saying “percentile.” Just what does 96 percentile mean?”

It means that if every Saanen on DHI test equaled 100 does milking, the 96<sup>th</sup>%ile doe has the GENES to bring in a bigger milk check than 96 of them. The remaining three of them bring in a bigger milk check than the 96<sup>th</sup> doe brings.

Lindsay Gay offered to buy CASSIE for \$13,000. But two other people had reserved her next doe and buck, so we couldn't sell. In 2016 there were 1600 Saanens that have ratings from official test, If a doe is 90%ile, she beats 90 out of 100, or 1440 out of the 1600, GENETICALLY.

“Why not just use 305's?” Because COMPARING her 305 ME's to her herdmates is way more important.

Because 305 2600 in Mississippi is WAY better than 305 3000 in Minnesota, for one thing. Because the 's 305 does not have all her ancestors' and descendants' and ancestors' descendants' lactations built in.\*\*\*

Main cut is rear leg angulation. Main asset is rump angle.

Video: [www.caprikornfarms.com/cassiopeia.shtml](http://www.caprikornfarms.com/cassiopeia.shtml)

After almost 40 years of breeding, her dam is probably our best doe. So, when ZTARTREK dies, CASSIE will probably inherit that spot. Back feet were red and irritated. She stared 2016 by having a huge dead kid pulled out of her. And as of April it looks like that trauma has ruined her lactation.

Went into heat again February 13, 2017.

STILL NOT PREGNANT AS OF January 1 2018.

PREGNANT October 2018 but no baby came in “18. Same story in “19 & ‘20.

<b>SG CAPRIKORN BOSS ERIDANA #404</b>	AS1665652	Born January 14, 2014
American Saanen 99%ile		LA VEVV 89 2 yo
02-01 305 4170 146 3.5% 116 2.8%		LA + EVV 88 3 yo
03-01 305 <b>4779</b> 159 3.3% 130 2.7%		
03-01 361 5189 177 3.4% 140 2.8%		

She almost died at the beginning of her 2018 lactation then she gradually came back to have a chance at Top Ten! In her 2017 lactation she was beating the whole herd.

Dairy Farmers - as a kid too showy, too expensive. We said, "As a milker not doing well. Are you a gambler?"

No one took her when she was cheap and now she is very expensive.

BUYER'S TIP; don't pay too much attention to baby lactations. Look more at the dam and sire.

SS: SG YELSON ++\*B

Dam 305 4990. Once the highest PTAM of any Saanen.

S: SG CAPRIKORN YELSON MEADOW BOSS \*B; died February 2, 2019

He was longer and taller than other Saanen bucks with very sharp withers. He looked awesome from the side and he was too narrow viewed from the rear. In 2012 Ben

Rupchis

placed him first over the other "B" bucks (BULGING EYE, STARBY, BIZNES) in spite of the narrow rear end. His full sister also had a **92** just like his dam. She is also a SGCH, just like his dam. AS OF HIS DEATH FEB 2019 HE WAS 10<sup>TH</sup> ALL-TIME ON THE DEC 2018 (Latest) ELITE BUCK LIST.

SD: **SGCH** CAPRIKORN RENOV MEADOW VIOLET 10\*M – 93rd %ile LA-92

Finished in only 4 shows, a total of 6 rings.

DS: SG ZEPPPO ++\*B

#3 All-time on the USDA Top Buck List LA-90 #11 on Dec 2018 ELITE BUCK LIST  
ZEPPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's. Also the 2017 305 Milk & Fat Awards, and the 2017 Lifetime Awards.

D: **SGCH** CAPRIKORN ZEPPPO CASSIOPEIA #292 – previous page Top Ten

"ERIDANA really nice topline. Big, growthy kid. Shoulders on the loose side." Judge Wolf. She put ERIDANA second to #486 on page p. 68a. The Appraiser put ERIDANA second to #443, ELBA, on page 14. We chose ERIDANA to be our entry in the Senior Kid Class at the 2014 Nationals. Her dam, CASSIE WAS OUR ENTRY IN THE MILKING 2 Y. O'S. Just when we thought we had an incredible Milk & Show double threat, the Nat'l show judge put her 18<sup>th</sup> out of 26. YECCHH! The big knock is loose shoulders. She was BY FAR the biggest kid in the class.

When we picked her as our kid to represent us at the Nationals. 486 EXTORIA was cuter but half as big. Bad decision. Judge Flickinger didn't care about size and flunked her for loose shoulders.

TIP: There is a reason the milk in stores comes from cows. The expense of Milking Labor is the same for a BIG animal as for a small animal.

Aborted December 2014.

After Nationals, she beat everyone including the Cherry Glen Nat'l Show doe at Frederick in September 2014.

Wayne Cullen said one word: "Rump."

Freshened in very late in 2015, June 28, with radically uneven halves. Alice says that was caused by prefreshening mastitis. As of September 1, they are starting to be much more even., but still unshowable.

Freshened in 2016. Still uneven. This doe was a mystery. April 2016 test right in the middle of the 2 year olds, but bag is not even close to being full. Friendly. She's really big. She's capable of cruising to well over 5,000 in 305 WITHOUT BAGGING. We'll see. We are using her son, HERCULES.

ERIDANA failed to get pregnant 2 years in a row, so on December 9, 2020 she had to go to the sale barn.

Scott looked at some of the recently fresh yearlings on March 10 2018 and he put this doe in the top 2. So he took her price up by 3,000 more or less. Her full sister below is an awesome deal because she does not yet have the looks phenotypically but she does have them genetically so her dau's will shine in your herd on the average.

*Loses points because did not freshen until March 23, 2019.*  
But came through on January 19, 2020. March 2020 - JUSTA is "paddle walking" and walking on her knees. Heart breaking. Still milks O.K. but cannot be sold.

In 2015 we said "As a milker not doing well. Are you a gambler?"  
No one took her when she was cheap and now she is very expensive.

BUYER'S TIP; don't pay too much attention to baby lactations. Look more at the dam and sire.

We previously said: "Going to keep these two for a little while because we are getting to inbred. Too much ECLIPSE and these are dau's of a CUMIN son." On March 10 Scott saw JUXTA's full sister looking very good so he lowered JUXTA's price radically. Very friendly.

This doe's sons are WONDERFUL opportunities for dairy farmers. First, the other dairy farmer buyers don't understand 99<sup>th</sup>ile, which means her sons will deliver maximum milk checks – milk/fat/protein. Assuming her sons also have SIREs with big milk/fat/protein. And they will. Secondly, the show people don't want her sons. Third, she has not made 4,000 yet. And she probably won't **until she is a four year old.**

***JUXTA finally milked up to her genes when she finished 3<sup>rd</sup> in the herd on May 26, 2022 test with 19.0 lb.***

Judge Katie Wolf put this kid up as our showiest doe kid out of around 70. And the judges at the  
Memorial Day show in Leetown agreed with her.

She lead all our yearlings in milk and protein after first five tests.

The mammary is NOT pretty so this was a great chance for a dairy farmer to get a son of hers at a very  
reasonable price. She has the body. Her close relatives have nice udders. Her son KLINGON beat the  
other 2 year old bucks for conformation on June 14, 2020.

The last DHI test of the year for us in 2016 was October 15. EKORIA was number ONE in the entire  
herd. The first DHI test for us in 2017 was March 9, and again EKORIA was number ONE out of all of  
the milkers! On her first test of 2020 she beat them all again as a six-year-old!

On March 30<sup>th</sup>, 2022 at the age of 8 years old EKORIA dropped an amazing 23.2 pounds on official DHI  
test.

On May 21 2023 EKORIA kidded at nine years old. Something happened and she when down. Her legs  
were thrashing and she could not get up. Scott thought it was a stroke. Several times Scott dragged her  
and made her walk a little. Then, SHE WALKED BY HERSELF! Back to the Milking Herd! Skin and  
Bones. Tester came. 3 pounds. Urggh. Next month - **10.4 pounds!**

HULA is 99<sup>th</sup> percentile doe and we were thrilled when she showed up in the 99<sup>th</sup> percentile.

Beat the pants off the other 2 y o milkers in her 2018 lactation.

And her Dau KOLO 834 is beating all our does born in 2018, 14 of them as of the April 2020 DHI test.

HULA did not kid in the 2019 milk test season. In 2020 she is beating them all again as of May.

Some National Saanen Breeders Association members will accidentally wander onto this list. Please

listen to me: HULA is not cute enough for your herd! Ben Rupchis put her first looks wise over all the

two year olds. But that was in very late lactation when her rear was no longer bulging and her teats were not pointing out like they do when she bags.

In addition to Ben's placing, HULA demonstrated her excellent confirmation when her daughter,

CAPRIKORN BE JAZZ #AS1842097, placed in Senior Kid Class at the National Show. Also, her

daughter, MACARENA, is quite good looking. We haven't taken her out yet as of May 2022, but we certainly could, and Paige Hohlstein reports that her full sister has a high tight sucked up mammary.

Grand vs 16 milkers AOP, then **BEST IN SHOW** AUGUST 10, 2015!

**BEST IN SHOW AGAIN SEPTEMBER 19, 2015**

We only show them until they finish.

DS: SG CAPRIKORN ZR FRA DIABLO \*B

DSD: CAPRIKORN ZECRET CUMIN 305 5142 LA-90 **TOP TEN** 3 Straight Years.!

D: SG CAPRIKORN FRA HULA 4\*M #654 **TOP TEN 305 5,000 LB**

HULA is 99<sup>th</sup> percentile doe and we were thrilled when she showed up in the 99<sup>th</sup> percentile.

Beat the pants off the other 2 y o milkers in her 2018 lactation.

Some National Saanen Breeders Association members will accidentally wander onto this list. Please listen to Scott: HULA is not cute enough for your herd! Ben Rupchis put her first looks wise over all the two year olds. But that was in very late lactation when her rear was no longer bulging and her teats were not pointing out like they do when she bags. In addition to Ben's placing, HULA demonstrated her excellent confirmation when her daughter, CAPRIKORN BE JAZZ #AS1842097, placed in Senior Kid Class at the National Show. Also, her daughter, MACARENA, is quite good looking. We haven't taken her out yet as of May 2022, but we certainly could, and Paige Hohlstein reports that her full sister has a high tight sucked up mammary.

DDS: CAPRIKORN ZEPPA CZARGATE

Not on the latest Elite Buck List June 2017

But dynamite numbers, especially fat, as of Dec. 2018; only has tested daus in one herd

DD: SG CAPRIKORN CZARGATE FOXTROT 3\*M

98%ile as of June 2017 Yearling LA +E++ 85

01-00 305 2455 102 4.2% 78 3.2%

Distant line on STARGATE. As a yearling, FOXTROT and her kids were EXCELLENT CHOICES for the Dairy Farmer that wants big production - yes - but is also willing to pay a LITTLE extra to get that E mammary into his herd. Not a looker. Really nothing wrong with her, but not one of the showiest of the milking yearlings April 2016. Came into her own as a 2yo.

DDD: CAPRIKORN BLUE ESTEFAN #422

02-03 288 3475 116 3.3% 97 2.8% **Awesome for a TWO year old! VVEV 88 3y**

KOLO is 99<sup>th</sup> %ile like her dam HULA , but look, before we gave her mastitis-

	Milk	Fat	Protein
HULA (DAM)	+371	+13lb	+11lb
KOLO (DAU)	+452	+18lb	+13lb

We own two bucks that suck up medials and we will use one of them on her every Fall.

D: CAPRIKORN J2 KOLO - see previous page.

Also 99<sup>th</sup>ile 3<sup>rd</sup> highest on March 2020 test.

DD: HULA - TOP TEN, 99<sup>th</sup>ile #1 on March 2020 test.

In addition to Ben's placing, HULA demonstrated her excellent confirmation when her daughter, CAPRIKORN BE JAZZ #AS1842097, placed in Senior Kid Class at the National Show. Also, her daughter, MACARENA, is quite good looking. We haven't taken her out yet as of May 2022, but we certainly could, and Paige Hohlstein reports that her full sister has a high tight sucked up mammary.

Her lower right front leg was bending out in late pregnancy but at a month & ½ fresh it is straightening . Friendly. We had another doe do this same thing with her lower leg.

We got some good hay once and LINE DANCER foundered, just like her grand-dam HULA, #654. LINE DANCER is at least the 3<sup>rd</sup> generation 99<sup>th</sup> %ile does so you wonder why her dam, J2 KOLO, HULA's daughter, the middle generation, hasn't foundered also.
