

# THE STARGATE FAMILY

(Rev. Sep 7, 2020)

BEGINNING OF THE STARGATE FAMILY

NEEDS MORE UPDATING. Mainly add completed lactations that started in 2019.

\*\*\*\*\*

**SG CAPRIKORN KRUG'S STARGATE** "393" AS1280418 Our Best Ever Born June 8, 2003  
American Saanen a 21.0 lb official test May 31 '06 3 y.o. LA-90 VEEE  
DIED MAY 24, 2012 a 23.5 lb official test June 30 '06 6 y.o. LA-89  
05-10 305 3653 109 2.9 a 24.0 lb official test Aug.26 '06 Only 2 times Appraised  
04-08 377 6105 176 2.9

04-08 305 5367 150 2.8 #1 in the USA AGAIN (over all breeds) NSBA GOLD SEAL

02-08 305 5140 160 3.1 #1 in the USA (over all breeds) NSBA GOLD SEAL

01-08 305 3220 87 2.7 NSBA SILVER SEAL

One of only two Saanens in the history of the U. S. that had two lactations of over 5,000 pounds in 305 days or less. Every 10 or 15 years nature sends us a genetic freak.

SSS: GCH\*B FOOTHILLS FARM MEADOW FORCE page 12 AI

SS: SG \*B CAPRIKORN FORCES'S BOLD JUDGE (Never Appraised)

BOLD JUDGE had a lot of angulation and 4 straight generations of Top Ten does.

0-11 305 1810 55 54

STARGATE had a PTAM of 386. At that time the highest Elite Buck was 385. MANDELLA purchased by CAPRIKORN at the '99 Spotlight Sale for \$1,300. CONSTANTINE'S grandmothers were the Reserve National Champion and THE National Champion. We are lucky he has a positive PTAM. Most show goats DON'T! The 92 is tied for the highest Saanen buck score ever. MANDELLA freshened with an udder hard as a bowling ball. Even the teats were like stone. Scott would have given her a "93" no problem. Alice says "No." Laid back, unassuming, matter of fact, and just kept eating. Eating at 2 a.m. when the others were lying around. ONE OF 13 SAANENS ALL TIME WITH OVER 5,000 POUNDS IN 305 DAYS. And a smashing first lactation from a doe that kidded at 1yr 8 months of age! Shown once, 3<sup>rd</sup> of 5. Shown 2<sup>nd</sup> time, RGCH to ROMANCE p.30. Shown 9/17/05, 3<sup>rd</sup> of 4. 4<sup>th</sup> time out GCH vs 14 over Diana Patton's entries and also DREAMCATCHER, the 2<sup>nd</sup> place National Show doe, on 5/27/06. 5<sup>th</sup> show 3<sup>rd</sup> of 7 same day. 6<sup>th</sup> show 2<sup>nd</sup> over Nelson Broaddus. Her full brother ROAD SHOW was also a 90! We didn't believe the Official Testers 21.0 so we weighed her exactly 6 hours after milking and got 5 lbs 7.5 oz. STARGATE BEST UDDER at 2006 District III Saanen Specialty over 24 Milking Does! In 1982 and '83, GCH HARTSELL'S HERD BB'S DOUG FRAN turned in lactations of 5110 and 5930, respectively. No other Saanen dairy goat had two 5,000 lb. 305's in the United States until STARGATE came along.

S: SGCH RENOVATOR AI ++\*B LA-92 formerly #1 on Sire Summary! Now "inactive."

D: SG STARGATE 1\*M! – previous page - our best doe ever. The pride of the herd.

ZTARGATE, 97<sup>th</sup>ile, HAS THE LONGER TEATS FOR OUR HANDMILKING HERDS. And is more powerful, smarter, and extremely friendly. But ZTARTREK excels her in style and sharpness and vigor. ZTARTREK'S mammary is close to perfect with the exception that the teats point a little forward. Also as she ages it is getting uneven. A fair question, if you are a potential buyer is: "When I see the difference between these sisters lactations, how can ZTARGATE be a 97? ZTARTREK is far above her and is only two points higher." The answer is that the computer is using ALL of the lactations of ALL the relatives. So the computer is saying it is possible that next lactation ZTARGATE may outmilk ZTARTREK. And that many times a ZTARGATE descendant will outmilk a ZTARTREK descendant. ZTARGATE's dau CZARGATE is milking\_awesome - 99<sup>th</sup> percentile.

BUYER'S TIP: Next time you have your pick between litter sisters- if you are breeding for milk- take the one that runs around the most. ZTARGATE failed to kid in 2011. Bad. Her mammary - not pretty. Teats pointing forward. BUT LA E. ZTARGATE aborted for the fall of 2012. Got very sick in summer of 2015 but came back into milk. ZTARTREK – you have to wonder what ZTARTREK would REALLY have milked if we hadn't hauled her out to Colorado and back for the National Show. Also, a better dry period. Also hauled her to Minnesota and back for another Nat'ls. Her last? You can also see ZTARTREK's huge area of attachment on her video: Video: [www.caprikornfarms.com/ztartrek.shtml](http://www.caprikornfarms.com/ztartrek.shtml)

"ZTARTREK has perhaps the most impressive rear udder arch I have seen on any doe, in any breed. And tight toes."-Ben Rupchis. "And you can quote me." ZTARTREK's 2013 Buck was bought for \$3,400. ZTARTREK'S 2015 buck kid was bought for \$6,995. She didn't kid in 2016. Still not pregnant Feb. 2017. June 14, 2014 - ZTARTREK RES GCH versus 18 Milkers. Tested pregnant by HERCULES November 2017! But those kids never conceived. code smh 89 ks - ZTARGATE

ZTARTREK STILL MILKING ON HER 10<sup>TH</sup> BIRTHDAY!

**CAPRIKORN COBALT SPACE LADY** #942 AS1998189 Born February 6, 2019  
American Saanen Never Appraised

Like all yearlings born in 2019, she started slow but is working her way up first 3 tests : 4.2, 5.8, 6.7.

S: SGCH CAPRIKORN ZURICH COBALT+\*B LA-91

COBALT has many milking dau's at CAPRIKORN. He is a fundamental part of our breeding program. His sister went for 2,600 and his brother went for 2,395 So Alice jacked up the price because she would like to have a ROCKET son for a change. The other three were bought This was an awesome looking baby buck. He had that sweeping look judge's love, starting from high sharp withers, traveling back along straight topline to a very good rump angle, being lower in the rump than the withers.

His PTAM, PTAF and PTAP% would make him about the equivalent of 95%ile. But although he has 24 registered dau's none have ever been on a test in a DIFFERENT herd than CAPRIKORN. So he does not print on the Top Buck (cdcd.us) or Elite Buck lists.

D: CAPRIKORN HERACLES JISA #7212 – See Previous Page.

In June Judge Jackson put her 5<sup>th</sup> of 6 and her comment was: 'Short bone pattern.'

On the other hand in September Scott said: "Fabulous teat placement on this show doe's very correct udder. The mammary is going to go EX and if she had a little more fore and the rear was just a little higher we would be looking at a high placing at Nationals. ",. :

She is going to finish around 1600 in her first lactation which is about right for a yearling show doe. We want our main herd does bred for milk to do more like 2300 to 3000.

Her dam JISA was right on the edge of being a great show doe. Middle of her classes. Not enough milk to stay at CAPRIKORN unless she was WINNING her classes.

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide! "

D: CAPRIKORN BAIL JERRIE MOCK 6\*M #7230 LONG TEATS FOR OUR HAND MILKERS

American Saanen, FIRST GENERATION. Hard to tell what a May 30 baby’s lactations mean.

01-09 277 2361 92 3.9% 69 2.9%

On August 20<sup>th</sup>, 2018, Scott said: “The mammary may be unbalanced, or it may be that the morning milker took the inflations off wrong.” Update April 2020. Balanced.

This doe is a wonderful value for a dairy. The two items that make her price lower are: 1: her nose is not a Saanen nose. 2: her rear udder does not go high enough into her vulva.

But these are things that have nothing to do with your milk check.

Her good qualities are: she is a good-hearted doe. Wants to do what you want. She has plenty of fore udder. She has great feet and legs. Her teats are long for hand-milkers. The rump is steep, but that will improve with age. Her teats are pointing forward and out, but only a little.

Very nice udder. Big escutcheons. JERRIE MOCK was a famous female pilot.

281 3992 TOP TEN

Full sister of ZTARTREK - our best doe? Or is it her dau CASSIOPEIA?

DD: SG STARGATE 1\*M page 1 of this family

#1 ON TOP TEN TWO DIFFERENT YEARS and tops over ALL BREEDS  
TWO 5,000 LB LACTATIONS!

Look at the butterfat Change! What's up with the lab? 10 tests every lactation. It can't be luck.

Radically out milked the other yearlings. Also the third showiest.

When you see her mammary from the rear, it really grabs you if you are a Dairy Farmer. An awesome baby lactation. Where is the 4.0 fat coming from?? TIP-In buying stock, you can depend on MILK breeding truer than FAT. But %iles (RANK) is more reliable.

For a dairy farmer that gets paid by components, and cares a little about build, but not too much,

**CZTAR IS ABOUT AS GOOD AS IT GETS. THE SAME IS TRUE OF HER DAU EZTAR 4\*M TOP TEN BELOW.** All does have flaws. For starters, none of them appraise at 100. Not even 96, 97, 98, or 99.

We paid to ship a son of a doe from the West Coast to Caprikorn just because that doe had 144 in fat..

Now here we have a home brew with 157. And 171

Th computer knows that her two dau's - EZTAR and EZZTAR are milking awesome. Both also 99<sup>th</sup>%ile. Both of CZTAR's 2018 buck kids started to wing out so we sent them to the sale barn for a loss of \$7,595.

We took her to a show for the first time in 2018 and the judge in one of the two rings made her RESERVE!! (over 12) We don't think of her as showy, *but*

*She has some genes for looks being plus 0.4 PTAFS AND a PTI of 254, 5<sup>th</sup> highest of any Saanen.*

**BUYERS TIP: IF YOU ARE A WORKING DAIRY, WHEN THEY ARE IN THEIR 6 YO LACTATION, IT MAY BE TIME TO THINK ABOUT SAYING GOOD BYE.**

Smh 90 code J!

Old CZTAR is starting to get skinny at 8. But she will still whack a younger doe with a sideways head butt at the overcrowded hay feeder.

SS: SG TORNADO ++B – A STANDOUT son out of a PRIME RATE dau

S: SG ZEPP0 LA-90 Elite Buck List formerly #7 on the latest USDA Top Buck List.

SD: SG SILLY SARAH 5\*M 99Rank, LA-91

DS: SGCH RENOVATOR ++\*B Elite Buck

D: SG ZTARTREK 2\*M 99%ile – p.60

DD: SG STARGATE 1\*M - our best doe ever

She is one of our friendliest goats. She is a giant. CASSIOPEIA #292 was our showiest yearling milker.

If five judges placed the herd in May 2016, at least 4 would agree that CASSIE IS OUR SHOWIEST

doe. One buyer signed up to pay \$8,495 for her. But her kid was reserved to a different buyer.

TIP:

\*\*\*Basic Bob says “OK, your catalogue keeps saying “percentile.” Just what does 96 percentile mean?”

It means that if every Saanen on DHI test equaled 100 does milking, the 96<sup>th</sup>%ile doe has the GENES to bring in a bigger milk check than 96 of them. The remaining three of them bring in a bigger milk check than the 96<sup>th</sup> doe brings.

Lindsay Gay offered to buy CASSIE for \$13,000. But two other people had reserved her next doe and buck, so we couldn't sell. In 2016 there were 1600 Saanens that have ratings from official test, If a doe is 90%ile, she beats 90 out of 100, or 1440 out of the 1600, GENETICALLY.

“Why not just use 305's?” Because COMPARING her 305 ME's to her herdmates is way more important.

Because 305 2600 in Mississippi is WAY better than 305 3000 in Minnesota, for one thing. Because the 's 305 does not have all her ancestors' and descendants' and ancestors' descendants' lactations built in.\*\*\*\*

Main cut is rear leg angulation. Main asset is rump angle.

Video: [www.caprikornfarms.com/cassiopeia.shtml](http://www.caprikornfarms.com/cassiopeia.shtml)

After almost 40 years of breeding, her dam is probably our best doe. So, when ZTARTREK dies, CASSIE will probably inherit that spot. Back feet were red and irritated. She stared 2016 by having a huge dead kid pulled out of her. And as of April it looks like that trauma has ruined her lactation.

Went into heat again February 13, 2017.

STILL NOT PREGNANT AS OF January 1 2018.

PREGNANT October 2018 but no baby came in “18. Same story in “19 & ‘20.

#3 All-time on the USDA Top Buck List LA-90 #11 on Dec 2018 ELITE BUCK LIST  
ZEPPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's. Also the 2017 305 Milk & Fat Awards, and the 2017 Lifetime Awards.

D: **SGCH** CAPRIKORN ZEPPPO CASSIOPEIA #292 – previous page Top Ten

"ERIDANA really nice topline. Big, growthy kid. Shoulders on the loose side." Judge Wolf.

She put ERIDANA second to #486 on page p. 68a. The Appraiser put ERIDANA second to #443, ELBA, on page 14. We chose ERIDANA to be our entry in the Senior Kid Class at the 2014 Nationals. Her dam, CASSIE WAS OUR ENTRY IN THE MILKING 2 Y. O'S. Just when we thought we had an incredible Milk & Show double threat, the Nat'l show judge put her 18<sup>th</sup> out of 26. YECCHH! The big knock is loose shoulders.

She was BY FAR the biggest kid in the class.

When we picked her as our kid to represent us at the Nationals. 486 EXTORIA was cuter but half as big. Bad decision. Judge Flickinger didn't care about size and flunked her for loose shoulders.

TIP: There is a reason the milk in stores comes from cows. The expense of Milking Labor is the same for a BIG animal as for a small animal.

Aborted December 2014.

After Nationals, she beat everyone including the Cherry Glen Nat'l Show doe at Frederick in September 2014.

Wayne Cullen said one word: "Rump."

Freshened in very late in 2015, June 28, with radically uneven halves. Alice says that was caused by prefreshening mastitis. As of September 1, they are starting to be much more even., but still unshowable.

Freshened in 2016. Still uneven. This doe was a mystery. April 2016 test right in the middle of the 2 year olds, but bag is not even close to being full. Friendly. She's really big. She's capable of cruising to well over 5,000 in 305 WITHOUT BAGGING. We'll see. We are using her son, HERCULES.

In 2015 we said "As a milker not doing well. Are you a gambler?"

No one took her when she was cheap and now she is very expensive.

BUYER'S TIP; don't pay too much attention to baby lactations. Look more at the dam and sire.

We previously said: "Going to keep these two for a little while because we are getting to inbred. Too much ECLIPSE and these are dau's of a CUMIN son." On March 10 Scott saw JUXTA's full sister looking very good so he lowered JUXTA's price radically. Very friendly.

This doe's sons are WONDERFUL opportunities for dairy farmers. First, the other dairy farmer buyers don't understand 99<sup>th</sup>ile, which means her sons will deliver maximum milk checks – milk/fat/protein. Assuming her sons also have SIREs with big milk/fat/protein. And they will. Secondly, the show people don't want her sons. Third, she has not made 4,000 yet. And she probably won't **until she is a four year old.**

D: SG CAPRIKORN ECLIPSE HARA #6112 AS1768686 Born March 5, 2016

A wonderful baby lactation 00-10 305 2495 883.4% 72 2.9%

Starting at 01-02 this would have translated into 3493! And she got rid of her dam's low b.f. %.

This is a great doe for a dairy farmer and a *terrible doe for a Show Breeder*.

01-10 305 3270 117 3.6% 97 3.0% awesome for 01-10

02-11 305 3618 120 3.3% 106 2.9% awesome for 02-11

**LONG TEATS, VALUE PRICE KIDS for DAIRY FARMERS!** (Show people don't want her kids)

Therefore prices stay low. BIG and POWERFUL but not pretty.

She is very friendly, likes to play with you, same as her brother, who we used as a herd sire.

Biggest of the 50 yearlings.

HARA had a bang up baby lactation, but nobody will equal her dam's 0-09 3250.

The first outstanding thing about HARA is her dam. WIARA accomplished two feats. No other saanen has done both things. First, she started a lactation by kidding at only 8 or 9 months of age and exceeded 3,000 pounds!! Second, she was still milking when Scott put her down at the age of 12. Although, Alice took her out of the milking strings because towards the end, she was not producing as much as the younger does and we didn't need the milk.

Second, HARA's sire is ECLIPSE who, as of June 2018, was number one of all Saanen bucks on the USDA DHIA Genetic Evaluations!!

DD: CAPRIKORN RV WIARA #644

07-08 314 2986 60 2.0% 84 2.8%

Lifetime 27,656 in 2560 days. WOW!

Not only did she start early, 9 months of age, but very few does can do 2,900 ending at 8 ½ years old.

Her dau ANDROMEDA was 10th? yrlnng milker at National Show

Her doe YIARA owned by Scarlett Payne. We used about 3 of her sons.

Our other Top Ten that year was WIARA's niece YIN YANG #821.

WIARA bred herself and kidded at 9 months of age! AND had a 16 lb test! WIARA was super friendly.

WIARA had a PTA for stature of plus 9.9, which was bigger than any buck in adgagenetics. At 1 yr & 6 months, bigger than the mature does. (MOOSE was a giant). So in Fall 2013 we were using BING, because he was born when his dam was 8 ½ months old. But he was bought.

WIARA's babies are friendly, have personality, and come up to you when you go into their pen.

Our oldest doe as of February 2016 and TESTED PREGNANT! We used her son, NEW STAR.

And in Winter of 2016 her other son HERACLES was the Clean Up Buck.

DDD: SG CAPRIKORN KRUG'S STARGATE - page 59 - #1 in U.S.A TWO

DIFFRENT YEARS! (All breeds) LA-90 & LA-89 & BUIS vs. 24 milkers. Over 5,000 in 305 twice.

Scott thinks LIARA is ugly as of May 2020. Many generations of great milk and now poor tests! How does this happen? **ALL** the yearlings started with very poor tests.

DDD: STARGATE-#1 in US. TWO DIFFERENT YEARS!

Beetle is elegant. She was a perky happy kid. Her dam won a big class in Frederick when she was a dry in 2007. On September 17, 2011, BETELGEUSE WENT GRAND at the same show and now has a dry leg.! OOPS! No tattoo by Alice.

BETEL has a nice mammary and a nice body. She can show. On May 25, 2013 she defeated BAHKTI, our second showiest two year old milker, going 3<sup>rd</sup> of 4 behind BLANCA and AIRACOBRA. Some pastern weakness is what keeps her from being a grand.. Her 2014 kids are beautiful. Her 2014 buck kid, beautiful, leased by Kahsay. Her 2015 kid, FORTHER went Grand at Leetown. In the fall of 2016 "Betel" defeated both AMAZING and AIRACOBRA. In a subsequent show, AIRACOBRA defeated both EXTRA ALOHA and CHEYENNE.

Codebb90

Way too old. Keeping her listed here in ase JoAnn wants to sll her kids or grandkids, A dairy in PA is using two of her sons.

**DDD: STARGATE!**

Placed first of the 2014 doe kids May 12. Very correct kid with lots of size for her age. Big escutcheon.

Judge Katie Wolf put this kid up as our showiest doe kid out of around 70. And the judges at the Memorial Day show in Leetown agreed with her. She was a little small for her age though.

She lead all our yearlings in milk and protein after first five tests.

The mammary is not pretty so this is a great chance for a dairy farmer to get a son of hers at a very reasonable price. She has the body. Her close relatives have nice udders. Her son

KLINGON beat the other 2 year old bucks for conformation on June 14, 2020.

The last DHI test of the year for us in 2016 was October 15. EKORIA was number ONE in the entire herd. The first DHI test for us in 2017 was March 9, and again EKORIA was number ONE out of all of the milkers! On her first test of 2020 she beat them all again as a six year old!

We are using her son KLINGON #888 heavily. That should be a clue for you to get one of her sons for yourself.

\*\*\*\*\*

**FIRST TIME TIBERIUS HALI** #677 AS1792025 Born February 16 2016

D: SG CAPRIKORN ZECRET BETELGEUSE #192 LA-90 — Three Pages Back.  
Beetle would have won the Lifetime Milk Award at the Nationals in 2018 but at the last minute  
she got sick and couldn't go.

DD: CAPRIKORN MP XTERRA 3\*M  
02-00 443 4118 117 2.8% 124 3.0% LA-86 NSBA GOLD SEAL  
Two things happened to XTERRA who was by far the best looking dry here. One, her mammary  
popped out. Between Moose and Prince it would be blind luck to get a beautiful mammary. Two,  
her tremendous body weight contributed to her developing rear pastern weakness. XTERRA  
DNA Registered VGL ID: ADG 20073208

HALI was an excellent looking kid. This is a show doe. At Leetown on May 26 she went Reserve Grand  
over EIGHT Caprikorn does! The front left hoof has a little problem when the doe moves sideways it  
slants out slightly sideways. Otherwise, an extremely good looking doe. BIG. When the Appraiser was  
here we put HALI up against the only four other yearlings with 88's and the Appraiser picked HALI.

HALI had a smashing lactation for a show doe and her first test was 17.1!  
This was JoAnn's one "show breeding." but she ended up with big milk anyway.

YELSON has two full brothers who have been rated. One had 397 and the other plus 457 PTAM. 457 is better than any buck on the Elite buck list. YELSON has 36 registered dau's as of October 2013. The Appraisers waved YELSON off. They have to do ALL the does but they try to save us the embarrassment of a low score on bucks. So they say "You don't want to do him" when he starts coming out of the pen.

But we love his Rear End Assembly. The Big Arc.

\*END OF THE STARGATE FAMILY - hopefully almost the whole herd will be STARGATE descendants in a few years mainly through YILDUN, her first son, STARBY, her 2011 son, and CZARGATE and CZARBUCK, her 2012 sons. But also her five daughters – WIARA, WUTANG, YILDA, ZTARTREK and ZTARGATE.

Ben Rupchis points out that 4 of these 5 dau's have lactations over 3800.

None of them have approached her 5300 lb in 305. Her granddaughter CASSIOPEIA came closest with a 4700 with far better fat than grandma.
