

THE XTORT FAMILY

(pronounced exTORT)

Revised 09/14/24 - Still needs more updating and editing

CRUZEIRO (305 days 5110 pounds) was our big breakthrough after 20 years in the business. Prior to that we never got much past 4300 in 305. But CRUZEIRO's breakthrough happened in **1994**. Years later XTORT sold more milk & cheese for us than any other doe ever.

CRUZEIRO was a race horse. Long and lean. And she would come galloping around the side of the barn when someone fed grain. Her metabolism was so high that she would lie down on her side in a puddle to cool off in the summer.

Three things we don't measure at shows are heart rate, respiration, and timpany. Possibly THEY are BETTER indications of greater milk than the things that the judges DO measure.

XTORT was a plodder. Small and compact. In her last lactation at an advanced age, she would **still** take the first spot on the ramp to the entrance to the parlor.

XTORT never talked. She just kept eating. When it became obvious that she was dying, Scott walked her out of the milking herd, back towards a dry doe pen. She plodded along and half way there she gave up and flopped down, sitting up.

Scott figured that was the end.

A minute later she got up and completed the journey. Three days later she died at the **age of 11**. Never said a word.

ADGA used to publish something called the AR. Around 44 pages of fine print showing every single Saanen DHI record for that year. One year the AR only contained one Saanen in the U.S. with an **11 year old lactation**.

(We can send you a copy of the 2007 AR if you want)

CUMIN, dau of XTORT, is the second generation foundation doe that DAIRY people want descendents from and she is located halfway back in this list. And in 2021 FROMAGE's daughters make FROMAGE, page 4, another XTORT dau, into another very key brood doe.

CAPRIKORN ATLAS'S CRUZEIRO

D: GCH YEN (please see p.21 of "Recent Bucks") 305 4050

DD: ROCKY RUN NICKLE #11 in U.S.

Almost all CAPRIKORN Saanens descend from her son GCH++*B CAPRIKORN JUDGE'S KRUGERRAND LA-91 formerly a Sire Summary buck.

CRUZEIRO WAS OUR BIG BREAKTHROUGH!

For our first eighteen years no one ever went over 4100 in 305 here and then CRUZER did 5110!!! She had a burp-tear in the stomach wall. Also, for two years, she walked on three legs. We thought she would die giving birth. Her December '92 baby went to the TRAILS' END herd. She radically broke all our records. But the udder by four years old was not showy enough for a show herd. That **IS** a "V" from the ADGA Appraiser and her dam **is** a GCH. She blew away the herd mainly because she was strong in the last four months. CAE positive and skinny for her last two years.

'95 1st BUCK \$525 by CHAINS p.22

PURCHASED by ANDREAS GARZA

'97 2ND BUCK \$1395

PURCHASED by CHERYL BEICHYL/PHIL KNIPPLE

They were happy with their KRONOR babies.

'97 1st BUCK GCH++*B CAPRIKORN JUDGE'S KRUGERRAND LA-91 is 2005 SAANEN TOTAL BUCK, and All-Time SAANEN TOTAL BUCK.

ATLAS was a giant who could be ridden into the ring. Frances Szasz, a brave little Quaker lady, rented a van and drove from New York to Missouri by herself to get DRAMBUIE.

BREEDERS TIP: If you have a doe born with a hernia you could believe you should cull her so she doesn't pass it on. DON'T! Cruzer has over 1,000 descendants and none of them inherited it.

07-10 313 3176 115 3.6% 86 2.7%

Lifetime 2,828 days 32,444 lb milk, 1069 lb fat, 873 lb protein.

Probably the highest of any living Saanen at the time of her death.

XTORT was the NATIONAL SAANEN BREEDERS ASSN GRADE TOTAL DOE

XTORT made TOP FIVE over and over. She beat our whole herd in 305 at least twice.

Lined on CRUZEIRO, but only 3/16ths.

We had a disastrous test on Oct. 20, 2009, but XTORT held her milk. Maybe she likes to eat soggy round bales out in the rain. Her sister lives in Canada now. Sold all her buck kids to dairies that do not register.

A long history behind this doe. We got an employment application from a person working in the Likuni Boys School in Africa. He became our herd manager and later started his own unregistered herd with our stock. When one of his does, PEPPER, went 5,000 on DHI, we got her dau. That was VANILLA, who completely lost one rear foot but kept on trucking with a **wide** mammary..

XTORT was for people who love goats who love people. She was the only kid to break out of the kid prison to follow you around while you do chores.

As of her death she was first in in our herd in lifetime milk, fat and protein. And we have been on DHI for forty years. Butterfat of 1069 pounds. Second place doe only 697!!

XTORT's mammary milked way down. This means she should get an "e" for udder texture.

XTORT was not a big doe, making her milk records even more remarkable.

XTORT'S DAU CUMIN WAS OUR BEST MILKER, did **over 5,000lbs in 305 days** and was #1 on the Elite Doe List.

Xtort has 7 related dau's. Their ratings, which were right there on adgagenetics as of DEC 2017 are:

89, 99, 84, 92, 94, 98, 97

All of them would be higher except that the computer does not know that DONUT only has one half left. Smh code 91 H

SG CAPRIKORN CZARGATE FROMAGE 3*M #537 AS1714218 Born January 26, 2015
American Saanen 99%ile *AN XTORT DAU* Yearling LA +VVV 85

TA DA -August 2021

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99TH PERCENTILE!!

Because she has great lactations?

NO!

Because the computer knows the lactations of all her relatives and they are beating their herdmates.

FROMAGE 99TH percentile GENETICALLY!

01-00 305 2476 83 3.4% 77 3.1%

02-00 286 2314 89 3.8% 76 3.3%

03-00 305 3227 117 3.6% 102 3.2%

You may ask “how does the computer give this doe a 99% based on those lactations, which are nothing special for CAPRIKORN?”

Well there’s no use in looking at her lactations because one side of her mammary is ruined.

The answer is that the computer knows all of her RELATIVES’ lactations. It is measuring her GENES.

So her OWN lactations hold her score down, but the relatives are so good the computer knows she could do better if she had both halves working right.

SS: SGCH RON-TOM SARAH’S ZEPPPO +*B

his dam 99th Rank PLUS LA-91 Elite Buck List #7 on a former USDA Top Buck List

DD: CAPRIKORN SNOW’S VANILLA GS1324559 93rd %ile

her 305 M.E. was 4750! 164! 122

01-01 232 2780 3.4% 95 2.6 71

Now FROMAGE is a half sister of CUMIN, who out-milked the entire herd three straight years, and also DONUT, who would have milked right with CUMIN but cheap-o employee milker Sam ruined her udder. DONUT way better looking than CUMIN. And also EXTRACT #490, who was KILLING them as a yearling, and now has a couple 4,000 in 305's and an LA-91.

And also JA FROMAGE (750) & JE FROMAGE (#751) broke **5,000lb in 305 days**. FROMAGE gave us KASHTA **305 days over 5,000 LB**.

FROMAGE was looking good, now chronically lopsided due to severe mastitis.

In 2016, we said “maybe she will mother the buck we are looking for”

That didn’t happen but she has **FOUR** Killer dau’s and **THEY** are reproducing and multiplying.

The word FROMAGE means cheese.

this doe was not in milk in August 2019. Apparently she got bad mastitis, dried off, re-breeding her. Scott cautioned buyers to BEWARE. She was a gamble. Update - freshened March 21, 2021. 95th %ile. Going to have to show us something in this lactation because there are too many XTORT Family members. UPDATE: showed us a 91.

S: SG ZEPPO +*B

Young Stock Final Score "V"(Just missed Ec)

#3 All-time on the USDA Top Buck List DEC 2016 LA-90 Whiteside

ZEPPO has 46 registered dau's as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.

The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPO dau's.

D: CAPRIKORN FLINT JE FROMAGE- 4*M #751 See pg. 5

Milked over 5,000lb's in 305 days!

KA EXTRAORDINARILY FRIENDLY

Great big power doe, massive body. Mammary not that pretty, but got rated Excellent.

This doe was 6th up on Scott's cull list and the top 4 went to the sale barn. Then the Appraiser laid down a 91. Suddenly she looks great and is worth several thousand.

DSD: SG CAPRIKORN RENOV'S WINNEMUCCA 4*M formerly 99th %ile

D: **SGCH** CAPRIKORN ZURICH HALLOUMI 4*M #634 99th percentile LA-90

HALLOUMI is the only SGCH in the 99th %ile on the Dec 2022 list.

HALLOUMI is the showiest of the yearlings as of June 2017.

Therefore her kids are overpriced from the perspective of a commercial dairy farmer.

On August 4, 2018, even though she was only a 2-year-old, the judge made HALLOUMI Grand over an AOP class of around 17 does. September 15th, 2018 - HALLOUMI goes Grand vs. 14 for her second Leg

HALLOUMI gets dragged out to five shows a year by Alice. One per month in the Summer. Each time her DHI projection drops because she is bagged up. Surely she would have a 4,000lb lactation to her name if we had a different show doe in her age class.

DD: CAPRIKORN CZARGATE **FROMAGE** #537 the only 99th %ile doe on the Dec '22 list.

DDD: SGCH CAPRIKORN WEALTH **XTORT** 2*M #756 ABOVE

This doe is skinny with a big mammary.

The American Show Goat Association judges will say that it's "out of proportion" if she is ever shown.

"Meaning mammary too big for body."

OR

"Body too small for mammary."

Take your pick.

But it is well attached so that is exactly what we want!

CAPRIKORN HERC KASSERI 5*M #840 AS1914526 Born January 29, 2018
American Saanen LA-89 3 Y O VEVE

Scott "Mammary VG or lower - not wide enough." Appraiser said: "E"

Loose shoulders, bulging rear. We use a complex In House rating system. She is the highest rated doe born in 2014 that we have. Maybe the dam of our next herdsire for this family.

code smh 85 ks 2yo 91 BB 3yo

Nov, 4 2018 Beat the whole herd on official test even though she freshened way back in January.

WINTER MILK! YEA! One of only 2 living CAPRIKORNS with THREE 4,000 305 lactations.

As of August 2020 EXTRACT IS NUMBER THREE ALL TIME on the USDA-DHIA GENETIC EVALUATIONS!!

She is a small doe like her dam and dau. WHAT IF WE CAN FIND A BUCK WHO WILL CRANK UP THE SIZE AND YET KEEP THE POUND FOR POUND MILK PRODUCTION?

In other words, if her offspring weighed 50% MORE, which is certainly attainable, would the 4221 lactation become 6332?

We are using her son PRIDE OF EXTRACT big time in 2023.

CAPRIKORN HONDO LOVE NUT #9185 AS2018821 Born March 24, 2019

American Saanen **98%**ile. ALSO plus 0.4 PTAFS!

MOCHA. Scott says: “A TRULY UGLY baby doe.” in March 2020.

Still has not kidded as of June 21, 2021.

Finally freshened July 9, 2021.

Bred 3 months later in October.

In December the USDA computer awarded her 99th percentile.

But how can you trust that based on a short lactation?

Freshened March 4, 2022.

First two tests: 14.3 and 17.9!

Still wanted to see if she can “Go Long.” Summer Spurters are a dime a dozen.

Then she was bought and went off test. Good looking with the exception of a weak medial.

This is the **XTORT** Family

Style, but loose shoulders, friendly. In April 2017, we said “Very nice looking mammary maybe EX” And in fact the Appraiser did go with “E.” WE WILL TAKE ALL THE DONUT DAUGHTERS WE CAN GET. In September 2016 the beautiful mammary was a perfect size - for a mature doe. We said “What that means is this awesome doe’s kids will be a good deal for dairymen. Because the mammary will grow too big for the American Show Goat Assn scorecard by the time she is two. So she will never have the really high placing that drives the prices up.”

code smh 85 ks 90BB

In August of 2017, the judge at the Howard County Fair made FUSILLI Best Udder versus around 15 does. But not Grand. On August 3, 2018 a different judge did exactly the same thing. That should give you a profile of what FUSILLI looks like. *Consistent with yearling appraisal scores above*

She isn't going to make 4,000 so we need a Dairy Farmer that wants:

1. beautiful udder and
- 2. 4.0%** lifetime b.f.

HER SON WOULD BE PERFECT FOR ONE OF OUR CUSTOMERS THAT SELLS FLUID MILK!
Cause guess what ? High fat tastes gooooooooooooood!

To be fair she has been our Aged Doe Entry at 4 shows a year for about three years. So all that bagging up has definitely hurt her total milk production. AND her two dau's on the next page PROVE that she has the milk and the USDA computer knows that and makes her 98th percentile - MORE MILK/FAT/PROTEIN than 49 out of 50 TESTED Saanens!

NEWS FLASH! GRAND vs 10 at a little county Fair Show on August 13, 2021 quickly followed by LA-91 on August 21st. BUYER'S TIP: KEEP THAT SLOPEY RUMPED DOE WITH THE FAB MAMMARY. The RA gets better with every year of age.

NEWS FLASH #2 - FUSILLI defeats Anne McKeever's great show doe EILEEN and goes on to become RESERVE GRAND CHAMPION versus 17 Saanen Milkers on June 4, 2023 at the MDGA Spring Show.

D: SGCH CAPRIKORN WEALTH **XTORT** 2*M LA-91 34,200 lb. Lifetime good fat SEE PG. 3
WINNER - LIFETIME MILK AWARD - 2013 and 2014 NATIONALS

This is the heaviest milking herd in the country and CUMIN beat the whole herd three years in a row and that's all there is to say. One year she was basically tied with CASSIOPEIA and CASSIE had better components. CUMIN's dam did it two years in a row in her day. CUMIN is way bigger than her dam, XTORT.

We want you to know her full sister CLOVE had a little extra teat. (SALE BARN)

At 10 days fresh, her rear udder was popping out like crazy. But it is set too far down from the vulva for the show folks. Back pasterns too straight up - knuckling over a little. Bulging rear. Perfect for dairymen. It's a strong mammary. Just positioned too far back for the judges, in Scott's opinion. Of course the 2013 National Champion had a BULGING REAR to Scott's eyes. Judge Jackson placed CUMIN 2nd out of 15 yearling milkers. As a 2 y.o., Scott thought the mammary was too big for ADGA.

Not enough fore, a Dairy Farmer's mammary, in Scott's opinion.

CAPRIKORN WIN'S MARJORAM #12 AS2065971 Born January 4, 2020
American Saanen LA-90 at 3yo

01-02 259 2235 82 3.9% 75 3.0% **98th %ile**

02-03 305 4600 180 3.9% 139 3.0% **99th %ile**

03-03 **286 5432** 197 3.6% 154 2.8% **99th Percentile.**

This lactation was cut short because MARJORAM got pregnant by the Clean Up buck who was running in with the milking herd.

SS: ECLIPSE HOPS *B- proven to have a PTAM over 300

SSD: BIANCHETTA **305 5,000 LB**

S: WINKEEPER *B proven at CAPRIKORN to have a PTAM over 300..

SD: WINSINGER 5*M 91st%ile

D: SG CAPRIKORN ZECRET CUMIN 3*M - See Previous Page.

04-00 **305 5142** 142 2.8% 141 2.8% LA-90

MARJORAM was our Yearling Milker Entry at the 2021 National Show July 22nd.
She didn't do great and the LA-90 backs that up.

But her show genes are not the highest considering that her full sister MAPLE was not that showy.

As a yearling we said: 'Of course her MILK GENES MUST BE PRETTY GOOD WITH THE TWO 5,000 LB IN 305 DOES right there in her ancestry.'

Her yearling lactation was okay and the USDA computer said "Plus **335** PTAM"

As a 2yo her lactation is **outstanding** and the USDA center said "+553 PTAM".

As of Aug 23' her lactation is **strong** and the center makes her **#1** in the U.S!

CLEARLY A STAR HAS RISEN!

In December of 2023 the new ratings come out and the computer makes her **PLUS 607 !**

BUYER'S TIP: This is why you need lots of REL. The difference between 335 and 607 may be the difference between survival or "they went out of business."

The building of MARJORAM -

Let's start with a wild card. Every once in a while genetic deviation throws out something special. Out in California a doe named BIANCHETTA does 5,000 lb in 305 day and of Scott gets the word.

We could try to buy her son but we thought BIANCHETTA was a little rougher than we prefer. In the picture it looks like her fore is chopped. Her connections kindly grant our request to breed her son HOPS to someone better built and they find the doe WINSINGER with an LA-91.

Next WINSINGER and HOPS had baby WINKEEPER and he comes East to us. 'WIN' then breeds CUMIN, by far the milkiest Saanen in the U.S. After the WIN dau's go on test it turns out he got the lucky sperm and egg combination. It becomes proven that he carries milk genes like his sire's genes instead of his dam's genes.

It's a process. We've done it dozens of time just to hit this one lucky number.

We HAVE a MARJORAM son, so the next one can be yours!

We tell you the bad stuff as well as the good stuff. MARJORAM is not friendly. Normally when you show a doe she gets handled by humans and turns friendlier. We took her all the way to Louisville for the Nationals and still she wants nothing to do with humans. She is not WILD. Just does NOT like us. "O.K. I tolerated being petted or hoof trimmed or whatever. Now cut me loose because I am SOMEBODY and you are nobody."

S: SG ZEPP0 +*B

Young Stock Final Score "V"(Just missed Ec)

#3 All-time on the USDA Top Buck List DEC 2016 LA-90

ZEPP0 has 46 registered dau's as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPP0 is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.

The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPP0 dau's
90 smh code ws

SD: RON TOM SILLY SARAH

She was an Elite Doe. As of June 2022 you can't find that list on adga.org anymore. And she had an LA-91. Easy to find her and reserve her next buck kid.

DS: ECLIPSE - #2 on Elite Buck List as of June 2020

D : CAPRIKORN ECLIPSE HARISSA #6142 - See Previous Page .

02-00 303 3294 96 2.9% 95 2.9%

02-11 289 3282 106 3.2% 94 2.9%

HARISSA is a **99th** percentile doe. 99 is as high as the scientists go. But she hasn't done 4,000 yet and 4,000 is what Amish Dairymen relate to.

We have her full sister HABANERO #6141 who, when you do the math on the ADGA website under Elite Does, has the highest milk/fat/protein rating in the U. S.

DD: CUMIN Top Ten **THREE STRAIGHT YEARS**
And #1 on the Elite Doe List

When she made her first record, JABUTICABA was a small doe because she was a very late kid, but a mighty milker with a big udder. Not good looking.

Being born on June 30 she is as much a yearling as a 2 y o. And being born that late she hadn't had a chance to show how much she can milk.

The classic Saanen head. Too bad we can't breed for that.

CAPRIKORN HOT KANDY #8205 AS1933587 Born April 05, 2018
American Saanen VEEE 90 @ 3 yo

Formerly 97%ile, has fallen to 92nd%ile with constant bagging up for nine shows.
00-10 248 1733 60 3.5% 52 3.0%

Disappointing for a HABANERO dau, but freshened at only 10 months. Uneven thanks to High School kids doing milking. Fabulous BC. Saanen head, showy body. Not very friendly.

Update june 2023 No longer uneven and now one of the top three show does.

SSS: SG ZEPPPO +*B LA-90

Young Stock Final Score “V”(Just missed Ec) **#3 All-time on the USDA Top Buck List**
DEC 2016. We have about 115 buck kids every year and when we picked up ZEPPPO at the airport after flying him from California he was bigger than any of our own kids.

paid for him and sent him to the sale barn.

JILL's complete show record:
2019 First show 1st of three, lost grand & Reserve to Araby Farms 3 y o in first ring
Second Ring, same

Second Show 1st & Grand. Leg #1. defeated 1 ARABY, one Diana Patton, Two C Creeks

Third Show 1st & Grand - Leg 2. Fewer entries

Fourth Show - Defeated by CAPRIKORN JWALA! No 3rd leg in 2019.
Scott failed to bag JILL enough. Late lactation.

Fifth Show - June 13, 2020 GRAND, 3rd leg, PERM!

The brotherhood of Saanen Breeders runs through XTORT's bloodlines.

Frances Szasz, a brave little Quaker lady, bred SHARMIN, who led the Saanen breed for three consecutive years in milk. All by herself Frances rented a van and drove to Missouri where DRAMBUIE of the famous Yarrow Hill herd was located and brought him back to the Hudson River Valley upstate New York City.

And the son of DRAMBUIE and SHARMIN was LEGEND WEST ATLAS.

Naturally, Scott went after the son of the 3-times #1 doe. In the first year he trucked two of his heaviest milkers up there to be bred. That didn't work.

In the second year, he leased ATLAS.

The third year, Frances allowed Caprikorn to buy ATLAS.

ATLAS begat CRUZEIRO who, in her turn, was #1 in the Saanen heard with 5,110 pounds. At that time there had only been one or two other 5,000 lb lactations in 305 days in the Saanen breed.

Cruzeiro begat GCH++★B CAPRIKORN JUDGE'S KRUGERRAND, who begat 92 registered Saanens, notably in the BETHEL herd.

BETHEL and CAPRIKORN sold bucks to the MN/IA/WI dairies, so KRUGERRAND probably has 15,000 descendants.
