

Beginning of
THE OLD RED LINE

DAIRY FARMERS: SKIP FORWARD TO PAGE 13
BETTER YET - SKIP RIGHT TO THE STARGATE FAMILY
rev 07/13/18 - need more updates

Even today we breed the Red Line pretty much straight for milk and components. As of January 2018, this family had 3 out of the top five spots on the USDA's Top Doe list, which you can find on adga.org under "Elite Doe."

This is the best group for a straight dairyman to choose from. They all wear red collars. And the best group for a show herd to avoid. NSBA people, skip to The CRUZER/XTORT Family.

Certainly they have had some show success. (NORTHERN DANCER had two legs and was 10th of 42 at Nationals. CHINOOK was a perm. MACY p. 6 had a 91 and two legs) SGCH BILEX deserves her 91. Both she and ALEX have BIS'.

We intended that there always be one pure Big Milk family and that is The Old Red Line. One day we suddenly noticed all the Old Red Line ugly milkers had been bought.

Most of the scorecard and the appraisers' "ideal ranges" are about LONGEVITY. But the truth is the average Holstein is only on line for 33 months. You only have room in your life and your barn for "X" number of goats. To earn a living you must immediately replace the low milkers with boomers.

The 2,000 lb DOE WHO LASTS FOR EIGHT YEARS LOST MONEY FOR YOU EIGHT YEARS IN A ROW.

The foundation does of the Old Red Line are:

1. REBEL VALLEY'S SOUTHERN BONUS 305 6850. At one time BONUS was recognized as the All-Time All-Breed Record Holder.
2. GOLD BANNER BETSIE LEE OVER 5,000 IN 305. BETSIE LEE also classified at 90!
3. MARIWILLO PRIDE'S SHARMIN, #1 on the Top Ten three different years!

These three led us to MACY –next page a lot of milk but also phenotypic conformation – two GCH legs and a 91.

MACY, aka VERONICA, is a home brew that goes back, way back,

The New Red Line comes from ILEX – more milk/fat/protein than MACY or anyone else, but not attachments. Lucky to have an 89. We reserved her before she was born because CARRA her dam was a 99th %ile doe and her planned sire was a Sire Summery aka Elite Buck List buck.

A useful coincidence - MACY and SGCH ALEX, 112A have something in common. Their mammaries can bag up like crazy. Most CAPRIKORN does are going to start dripping at 13 to 16 hours. Maybe even 9 hours. These two could bag for close to 24 hours and hold 17 to 18 lb of milk at any one time. Not recommended. But you can understand that the doe that starts dripping with 7 lb can physically never have a 7,000 lb lactation, and that's where we want to get someday.

1-11 443 5210 156 3.1% (EXTENDED)

1-11 305 3360 103 3.1%

MERIDIAN led the herd with 14,600 lb. lifetime.

MERIDIAN did 15 lbs on June '02 after milking 305 already!

MERIDIAN was shown once in her life.

June 7, 2003 1st of 3 under Quagliano. GCH was PILOT

MACY is on the video. She ended with 17,109 lifetime with 3.2% fat and 2.8% protein. MACY was a long doe with a long neck and a marvelous topline and just a little narrow in the escutcheon. She resembles SHARK almost exactly. ADGA judges love long necks, but they actually have no connection to big milk. MACY was conceived at Caprikorn but born somewhere else. She was so scared and wild she wouldn't stand still for the inflations. On Sale Barn day she suddenly started to behave! MACY'S son YOLAND sire of 2011 Sable Jr. Champion of Nat'l Show. Complete show record listed in Saanen show goats catalogue. The great thing about MACY was her abnormal capacity. Her mammary looks big, but not sloppy gigantic. Yet she could bag up for 17 hours and be holding 14 pounds at a single milking.

E. T. DAUGHTERS MILK BETTER HAN ANY OTHER BUCK WE EVER HAD. We want to disclose that #5176, FOX's sister, had an extra teat. Sale barn. GALLANT FOX has a lot of personality. In March 2016 we said "She will get a high placing at the National Show in the first week in July 2016. And then someone will buy her for milk because we don't need a 75% Grade Saanen." As of February 2017 Alice's show string was looking kind of bleak, GALLANT FOX had freshened for the first time with a NICE mammary, so we upped her price by \$2,000 to keep her to show. Should have made your move when she was \$2,000 cheaper.

6-10 311 2540 82 3.2%

7-10 267 1352 49 3.6% 42 3.1%

Lifetime 2268 days 21,380 milk 724 fat 691 protein

We reserved this doe before she was born. Then, per the contract, we got the pick of three doe kids. ILEX was a 99th percentile doe and her dam CARRA was a 99th percentile doe. At that time there were only 16 living Saanen 99th percentile does. 99 is as high as USDA goes. ILEX beat the whole herd in milk/fat/protein. 3.2% is as high as Saanen's go in protein. An upstanding doe with no attachments. She is a tribute to Cecile Beauchemin, who had the will power to stay on DHI test for years, and to always breed to Sire Summary/Top buck List/ Elite/ Top 15% bucks. Never bothered to show.

We said: "She is dying as of April 2016."

After being dry for most of 2016, SHE KIDDED FEBRUARY 2017 AT TEN YEARS OLD!

ILEX HAS A VERY HIGH REL - 77! What does that mean? It means she has had 18 kids, 11 does, 6 of the does have been on DHI test. It means that when you look at her Rank of 97, you can count on that. You would rather have a rank of 97 - better than 32 out of 33 Saanens - than a rank of 99 with a 42 REL. Because that 99 may change BIG TIME. But the 97 won't budge much.

DS: SG YELSON +*B-maybe our milkiest buck

D: CAPRIKORN YELSON DILEX - #3169

She was our junior yearling entry at 2014 Nationals in early July 2014. When ALICE got to
Louisville she bought some awesome alfalfa at the National show for our does and DILEX
promptly foundered. In spite of that she was **3rd place** out of 9 at Nationals July 16, 2014!
As of December 26th 2014, she was no longer “paddle-walking” so it was going to be “All about
that udder”. It came out really awesome, but Alice’s cheap milkers almost ruined it. Their idea of
milking is bring the doe, in, teat dip, put the inflations on, push the doe out. The fact that no milk
came out of the udder didn’t bother them. Count on Alice to hire three cheap incompetent people
instead of one expensive competent herdsman every time. So DILEX is not having a good second
lactation. But she showed O.K. in spite of the udder damage - one of the best 4 yearlings, if you
level her out. She kidded in March 2016 and the mammary was uneven again. URRGHHH! Same
for 2017 when she came with three dead kids. She is a big power doe, and a lover, but too
sensitive. Needs to be stretchier.

SMH - 84 code J SMH - 89code BB

DD: SG DAUGHTER’S **ILEX** page 8 Top Ten Twice

We said: “DILEX will be the next CAPRIKORN All-Star. Best of her year’s class in milk &
show.” We were wrong. Sam, the milker with no integrity, ruined her udder.

FELIXA as a kid was a little too frail. Very friendly. Now sturdy, she kidded January 2016.

The mammary is a little uneven and the teats point out just a little. So that is going to make this
doe a terrific deal for dairy farmers.

What 94%ile means: If you bought 100 does from Saanen herds THAT ARE ON TEST, on
average, 5 of them would outmilk FELIXA IN YOUR HERD. And, IN YOUR HERD, FELIXA
would outmilk 94 of them.

(When it comes to PERCENTILES, also called RANK, “outmilk” means with the b.f. and
protein figured in).

3-11 364 4530 162 148

ILEX was a 99th percentile doe and her dam CARRA was a 99th percentile doe before her. There were only 16 living Saanen 99th percentile does. 99 is as high as USDA goes. ILEX beat the whole herd in milk/fat/protein. 3.2% is as high as Saanen's go in protein.

Tip to Goat Buyers – look at how the fat % jerks around. Considering there is 10 laboratory tests in every lactation, that shouldn't happen. So, in buying, rely MORE on the MILK NUMBER than the bf #.

Good grief -172 lb of fat in 305!

BILEX was only shown 7 times to get her 3 legs. Her b.f. would make TOP TEN easily. She has a nice mammary PHENOTYPICALLY but not GENETICALLY. Meaning - it looks GOOD but her family as a whole has average udders. Scott hand milked this doe and he really likes her buck kids for a dairyman that does not register. The udder milks down to almost nothing, she is strong, she is friendly and willing.,

She has two very showy daughters: GCH DILEXINA and a second powerhouse; EXOTIC who beat about 20 milkers to get GCH WHILE SHE WAS A YEARLING MILKER Tragedy struck when a buyer chose EXOTIC for \$1,795. Heavy price to pay for a grade. We thought she was safe here. BILEX is so big you have to guess she is a ZEPPO daughter.

Injured

Elite Doe **99th percentile- as high as they go! AND SHE IS BETTER GENETICALLY**

than her usda/cdcb/adga rating because of the limping. For the dairy farmer that wants more milk and protein %.

S: CAPRIKORN ZURICH +*BLA-90 highest living ranked USDA

SD: SG CAPRIKORN TZAR'S YENUSKA 1*M under BABKA

DS: SG DAUGHTER'S UTAH +*B- former Elite Buck

D: SG DAUGHTER'S X ILEX 9*M TOP TEN TWICE 98th %ile – page 8 LA-89. Big components.

DD: SG DAUGHTER'S CARRA 9*M 99th %ile Elite Doe

There is something wrong with CYLEX's rear right leg. So we can never sell her. She holds it slightly off the ground when she is standing still. She walks O.K. Alice says she hit a nerve when she was giving a shot. She is super friendly even though she will never be shown. Only one in a thousand Saanens can beat a **protein** % of **3.2**. And that would probably be a lab error.

What could she do if both legs were right?.

The 3724 doesn't grab the buyers' attention. But with those components, CYLEX makes more money in the milk check than most 4,000 lb does do. AWESOME DAIRY FARMER VALUE because show folks don't want an 86 and don't even know what 3.2% protein means or what it pays! And they DEFINITELY don't want a mammary that scores "+."

CYLEX IS NUMBER 4 on the USDA Top Doe list, which you can find at adga.org under Performance Prrams listed as "Elite Doe."

SS: SG ZEPPPO +*B

Young Stock Final Score "V"(Just missed Ec)

#3 All-time on the USDA Top Buck List DEC 2016 LA-90 Whiteside

ZEPPPO has 46 registered dau's as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.

The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's

D: SG CAPRIKORN ZURICH CYLEX #2108 – **99th** %ile as of Jan 2018 - back 2 pages

DD: SG DAUGHTER’S X ILEX 9*M TOP TEN TWICE 97TH %ile -above

Weak pasterns, narrower rump than the other kids, hocks in.

Very friendly, comes up to be petted.

No Saanen has 3.4 protein. That was based on only 9 lab tests. We said, “so it should drop as the law of averages accumulates.” After 52 lab samples, she is down to 3.3% protein lifetime, highest of any Saanen we know. She has been one of the last to kid two years in a row. That is why the lactation starts with 1-02 instead of 1-00.

A fair question is: “How can this doe be number 5 in the country when her top lactation is only 3,435?”

It’s complicated. But the two simple answers are:

1. The computer knows about hundreds of her relatives’ lactations compared to their herdmates. So the computer is assessing her DNA. Her next lactation on the average will be a monster
2. Our dairy farmers get paid by PROTEIN - 4,000 LB OF MILK AT 2.7% IS ONLY 108 LB OF PROTEIN. And butterfat - 4000 at 2.8 is only 112. .

CAPRIKORN HONDO JELEXINA #784 AS1842723 Born February 26, 2017

SS: CAPRIKORN YELSON FLINT *B
SSD: CAPRIKORN KRUG'S XING

S: CAPRIKORN FLINT HONDURAS *B

We took FLORENCE to a show the Saturday before Memorial Day 2016 and she beat four of our other yearlings in all three rings.

We took HONDURAS to a different show on June 5 and he was 4th of 4 in one ring and 2nd of 5 in the other. As of Sept. 2016 we are using HONDURAS on some of our "milk and Show" NSBA type does. Awesome BC beyond excellent. Right rear heel is shallow. Very friendly, Excellent escutcheon. VG rump angle.

He was number one on the Elite Buck list when we bought him

Died February 20, 2016

When we bought him in Fall 2015 he was NUMBER ONE on the Elite Buck List.

We knew that some of our bucks would eventually prove higher. But we were desperate for an outcross. We were too inbred. Scott always wanted an ELF descendant, but they kept ending up with only one udder half. He looked better than an 89 to Scott.

The second pillar of the Old Red Line Family
American Saanen Tall, upstanding TOP TEN TWICE – LA-89
especially for the dairy farmer after PROTEIN

Loose shoulders. Started her 2017 lactation by aborting. So that will probably ruin her rating. On March 12 Scott described her appearance as “Almost exactly average for the Saanens is the U.S., and below average for our herd. 5 on a scale of 1 to 10.”

Very rough childbirth 2018, thought she had died.

CAPRIKORN BE KURLIN #895 AS1916809 Born February 08, 2018
American Saanen Never Appraised

SS: SG YELSON ++8B

YELSON has two full brothers who have been rated. One had 397 and the other plus 457 PTAM. 457 is better than any buck on the Elite buck list. YELSON has 36 registered dau's as of October 2013. The Appraisers waved YELSON off. They have to do ALL the does but they try to save us the embarrassment of a low score on bucks. So they say "You don't want to do him" when he starts coming out of the pen.

But we love his Rear End Assembly. The Big Arc.

S: SGCH CAPRIKORN YELSON BULGING EYE +*B

PLUS 306 PTAM Novmeber 2017 LA-90

Coming into the Fall 2016 breeding season, Scott had a lot of bucks to choose from. If you averaged his sire and dam's and two rated dau's percentiles and PTAM's – BULGING EYE was the highest rated buck here. So we went with him. Our judgment was vindicated when the December 2016 ratings came out. He got a plus 302 in milk, higher than any buck on the Elite Buck List. But he does not appear on the list.

SD: SG CAPRIKORN SNOW'S ZANONI 5*M

99th PERCENTILE- as high as they go.

04-08 324 4336 133 3.0% 112 2.6%

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide! "

D: CAPRIKORN BAIL JAZIL

DDS: CAPRIKORN SNAP E.T. **highest rated guy possible - both parents 99th**

DD: CAPRIKORN E T GALLANT FOX

75% Grade Saanen 25% Alpine

3rd Place at Nationals

E. T. DAUGHTERS MILK BETTER HAN ANY OTHER BUCK WE EVER HAD. We want to disclose that #5176, FOX's sister, had an extra teat. Sale barn. GALLANT FOX has a lot of personality. In March 2016 we said "She will get a high placing at the National Show in the first week in July 2016. And then someone will buy her for milk because we don't need a 75% Grade Saanen."

As of February 2017 Alice's show string was looking kind of bleak, GALLANT FOX had freshened for the first time with a NICE mammary, so we upped her price by \$2,000 to keep her

to show. Should have made your move when she was \$2,000 cheaper.
DDD: CAPRIKORN CONQUEST WAR EMBLEM #4150 AS1699235
WAR EMBLEM bought soon after she started her first lactation.
Never got a chance to show what she could do on official test.
Very few buyers are on test. That is why their goats aren't any good.
