Our long awaited line breeding on ROCKET. Four people spent 3 hours trying to pull this doe, and finally succeeded. She was not one of the top 9 showiest kids. But we knew that could happen with linebreeding, and we believed her out cross offspring would be super. Mainly expecting the flat rump angle. ROCKET'S FINAL STATEMENT. Not enough fore. Walks uphill. Sharp withers. Tight shoulders per Scott. Only "Good Plus" per Eric. As of March 2016 we had seen two dau's and they were both really well built. #3 All-time on the USDA Top Buck List DEC 2016 LA-90 Whiteside

ZEPPO has 46 registered dau's as of January 2016. His dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. To breed for higher fat and protein you have to sacrifice a little milk. We already have half a dozen does that come in at 3,9xx lb. You might pass over these does in favor of a buck kid from a doe that comes in at 4,xxx. BUT BE AWARE THE HIGHER FAT/PROTEIN DOE BRINGS IN A BIGGER MILK CHECK.
